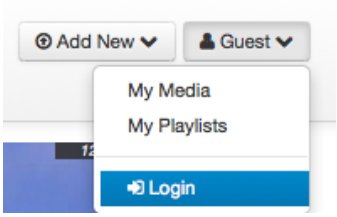
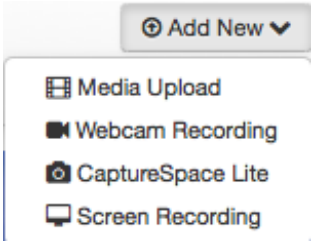
Install CaptureSpace Lite

CaptureSpace Lite is a user-friendly screencast and webcam recording tool that is fully integrated with the video streaming site Kaltura. It is similar to programs such as Screencast-o-matic and can be downloaded onto university and personally-owned computers.



1. Go to kaltura.uwec.edu in a browser such as Firefox or Google Chrome.
2. Select **Guest** in the upper right corner and select Login.
3. Login using your UWEC username and password.



4. Select the **Add New** button and select **CaptureSpace Lite;** you will be prompted to download the program.

5. Select the correct version for your operating system (Windows or Mac).

6. Follow the prompts to download and install CaptureSpace Lite. The process varies depending on your browser and settings. Contact the Help Desk if you have problems with the installation: helpdesk@uwec.edu or 715-836-5711.

This process only needs to be completed once per computer; the next time you login, go to **Add New** and select **CaptureSpace Lite** to start recording. See the **Record with CaptureSpace Lite** document for instructions.
