Subject
Heavy Duty Replacement Air Filters

The A700136/138 Enginaire housing allows for an additional “Safety” filter. The main filter element fits over top of the Safety Filter and ensures that any dirt particles dislodged during a filter change are unable to move to the clean side of the filter. (Figure 2)

These filters are not supplied by VMAC but are fully compatible with our systems and will have no noticeable effect on CFM.

 Filter may not be exactly as shown, image is for Safety Element location only. (Figure 2)

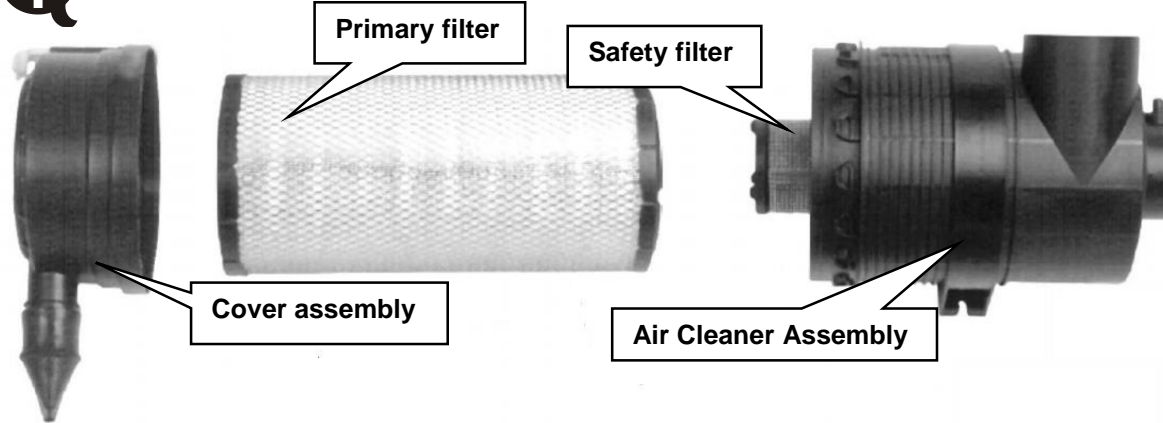

Figure 2

Figure 3 shows an example of the Safety Filter.
