

ASSESSING SAFETY AND CONTROLLING SAFETY THREATS

Agenda

Section 1: Welcome and Review (90 Minutes)

Participants will:

- Be introduced to one another and the trainer
- Identify their learning needs specific to this lab
- Identify interviewing and engagement strategies to use to assess child safety

Section 2: Interviewing to Assess Safety (90 Minutes)

Participants will:

- Use engagement strategies and interviewing skills to gather information necessary to assess child safety
- Use the seven steps of critical thinking to assess safety and develop appropriate safety plans
- Develop interview questions to gather information about safety factors, protective capacities and child vulnerabilities

Section 3: Documenting the Assessment of Safety in SACWIS (90 Minutes)

Participants will:

- Document safety factors, child vulnerabilities, protective capacities and historical information in the appropriate fields in SACWIS

Section 4: Safety Planning (75 Minutes)

Participants will:

- Develop a safety plan that controls safety threats
- Document a safety plan in the SACWIS system

Section 5: Workshop Close (15 Minutes)

Participants will:

- Identify strategies to promote the transfer of learning to their work
