Activities allow you to link to other tools or files in your modules. Content displays the outline for the course therefore you may want to link to quizzes, discussion, dropboxes, or websites. Place in chronological order because students view content from top to bottom.

**Add Activities**

1. Select the module in which to add an activity.

2. Click *Add Existing Activities*.

3. Select the activity you wish to link.
   
   **NOTE:** For this example, we are linking to a discussion topic. You can also link to dropboxes, quizzes, etc.

4. Select the name of the forum, if applicable and select the name of the discussion.
