Embed Videos in Discussions

Students can embed videos in D2L Discussion boards. The videos must already be uploaded to Kaltura - see the guides for uploading on a mobile device or uploading on a computer if necessary.

1. Log in to D2L and access your course.

2. Select Discussion from the top navigation pane.

3. Click the topic title where you would like to post.

4. Select Start a New Thread to create a new post or reply to a previous post.

5. Enter a title for the post.

7. Click Kaltura My Media on the left pane of the dialog box.

8. Browse through your Kaltura media items, select the applicable video, and click Next. 
   
   NOTE: Selecting the video thumbnail allows you to preview the media before selecting it.

9. Preview the media in the Insert Stuff dialog box and select Insert. The video appears in the textbox.

10. Select Next and select Insert.

11. OPTIONAL: Add text to the textbox and/or upload any files.

12. Select Post when you are finished creating your post.
