Create Video Clips

Videos can be clipped in Kaltura to focus on specific parts of the video. This allows students and faculty to view the desired video portion easily.

Get Started

Clipping a video allows you to create a new, shorter video.

1. Login to Kaltura and select My Media.

2. Select Edit next to the video you would like to clip.

3. Select Create Clip and complete one of the sections below.

Create Clip with Pause and Play

1. Play video until desired start time then pause the video.

2. Click Set Starting Point.

3. Continue playing video until desired end time then pause the video.

4. Click Set Ending Point.

5. Enter a name for the new clip when finished.

6. Click Create Clip. The new video clip is saved to your media after a few moments of processing.
Create Clip with Start and End Time

1. Enter the desired start time and end time in the appropriate boxes.

2. Select Preview to view the clip.

3. Enter a name for the clip when finished. Click Create Clip.

Create Clip with Timeline

1. Click the icon in the gray field below the video to view the timeline.
   
   NOTE: You may need to update Adobe Flash Player before using this feature.

2. Drag the marker to the desired start time. Click Set Starting Point. The portion of the timeline left of the marker will be removed.

3. Drag the marker to the desired end time. Click Set Ending Point. The portion of the timeline to the right of the marker will be removed.

4. Click Preview to view the clip.

5. Click Create Clip when finished. The video is saved to your media after a few moments of processing.
