

Release Notes

Version 9.5.3
August 2017

What we updated?

Capital Works Fund – Specific to Victoria, Western Australia and New Zealand

Previously implemented updates related to NSW Legislation were inadvertently changed for all regions.

The renaming of the “Sinking Fund” to “Capital Works Fund” is not correct terminology for Victoria, Western Australia and New Zealand.

This behaviour has been corrected in this release. Client-facing reports referencing "Sinking Fund" or "Capital Works Fund" have been updated to reflect the correct terminology for all regions.

User Configuration/Rate Per Hour

To resolve the error occurring in User Configuration when saving where the rate per hour field contained more than 15 characters, the maximum number of characters in the Rate Per Hour field has been restricted to 15.

Multiple Miscellaneous Owner Invoices

An error occurred when producing Multiple Miscellaneous Owner Invoices where a Strata Plan was not selected. The print preview button will now only be displayed if a Strata Plan has been entered.

Multiple New Lots – No Entitlement Values

To resolve an error occurring when creating multiple new lots if no entitlements values were set by the user; when creating multiple lots a pop-up will now warn the user if no entitlement values are set.

Accounting > Adjustments > Search/Cancel Bulk BPAY Payment File

The search will now reset the BPAY CRN and Invoice ID columns to blank fields when an invalid value is entered.

Submetered Invoices

When tabbing out of the Submetered invoices fields, some fields were being pre-populated with previous Submetered invoice entry values. All previous values will now be removed.
