

# Building Compliance Into Every Job

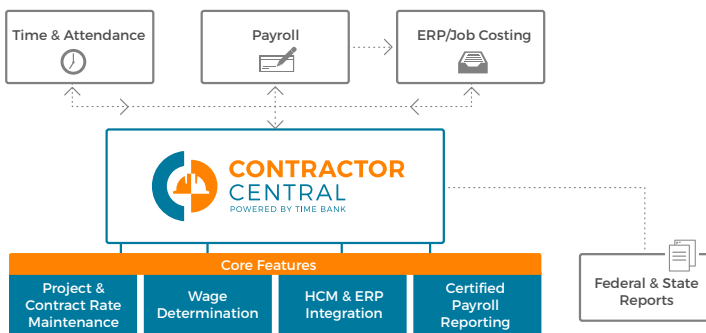

## What is Contractor Central?

For construction companies that want to outsource payroll/HR, IDI's comprehensive web-based application Contractor Central ensures employees are paid correctly, automates the creation of Certified Payroll and other reports, and exchanges data with leading ERP/Job Cost systems.

Contractor Central keeps companies compliant on their government-funded projects by automating wage decisions for employees working on a mix of private, public, and union jobs. The application's flexible, project-specific tables accommodate the wage and benefit complexities of Davis Bacon Act, Service Contract Act, and Union Contracts.

By automating pre-payroll rate decision logic, Contractor Central ensures that all employees are paid according to the contract and that the post-payroll reporting and data transfer to the ERP is accurate and timely. With Contractor Central, companies can benefit from the tax and other compliance benefits of outsourced payroll/HR as well as accurate data in the ERP to better understand true project costs.

## How does Contractor Central work?

## User-friendly

- Intuitive project and rate maintenance screens for both project managers of construction companies setting up new government-funded or union-based jobs as well as the payroll team back at the office
- Integration with time and attendance software to retrieve employee time to jobs, projects, etc.
- Single-point entry removes the need for dual maintenance of information across systems
- One-click operations to automate wage & benefit decisions, create Certified Payroll Reports and exchange data between outsourced Payroll and ERP

## Reliable and Cost-Effective

- Leverages IDI's Time Bank technology backed by 30 years of industry knowledge and 30,000 satisfied clients
- Replaces costs associated with error-prone manual data entry or spreadsheet calculations with automated calculations and data transfer
- Transfers post-payroll Job Cost and General Ledger results to leading ERPs including Sage300CRE (Timberline)
- Provides free upgrades as your payroll and ERP systems change versions
