

12.6.18: Triggers and Charts

This release includes updates to the UI, specifically the Trigger creation page to increase ease of use, and a new chart type to enhance customization. The following features are now available:

- **Triggers**
 - Creating a Trigger is more intuitive by updating the process and UI options.
 - When viewing Triggers, the default is now Active, instead of Active/Paused.
- New **chart** type: Events Table allows you to add and customize columns to see timestamps, users, messages, etc.

Watch the video below for a quick run through on the great new updates!

What do I need to do?

No action is required to benefit from these updates. However, its always a good idea to visit the [Downloads page](#) to make sure your DVM and Windows Agent are up to date.
