

Online Registration – Main Checklist for a Successful Rollout

Please review this checklist to be sure you feel confident and understand the relationship with Jackrabbit and your website.

There are four separate online modules you can use that are fully integrated with Jackrabbit. Select one or all, there are no additional fees, everything is included in your monthly Jackrabbit subscription.

- ✓ Online Registration Form
- ✓ Parent Portal
- ✓ Class Listings Tables
- ✓ Online Event Registration

Review these 5 items and check the boxes when done:

I understand there are four separate online modules (listed above) that I can integrate with my website and Jackrabbit. Each one has set up instructions and its own html link or code to make it work.

I have selected which of the four modules listed I would like to have fully integrated into my website. I can locate the set up information in the [Jackrabbit Help Center](#). I have found the [Integration Assistance](#) page in the Help Center.

I have seen several examples of this integration on some of the client websites list in the [Client Website Examples](#) article. I have a good idea how I want my integration to look and function.

I can edit my own website, or I have a web developer that edits pages for me. I will have to provide my web developer will access to Jackrabbit to see the names of my *Categories*, *Sessions*, *Locations*, etc. They will be able to make [customized class listing tables](#) for me.

I understand I will have to create all the values listed above, *Categories*, *Sessions*, *Locations*, etc. in Jackrabbit. Refer to [Customize Drop-down Lists – An Overview](#) for more details.

You are ready to start setting up all your online registration modules!
