## Who is IDI?

Integrated Design (IDI) has 30+ years of experience working with 30,000 companies from diverse industries. We have helped thousands of companies automate very manual and time consuming processes that were previously being done on paper or spreadsheets.

Our solutions integrate with Time & Attendance, Payroll, Human Resources, Point-of-Sale, ERP, Mobile, and many other systems to help enforce a company's specific pay policies and transfer data.

## What is Time Bank™?

Time Bank Online is a web-based application designed to connect multiple employee systems and provide customized functionality.

Time Bank's integration engine combines years of application knowledge and experience with industry-standard development tools and techniques with the capability to accommodate APIs, web services, XML, and various ASCII based files.

Accessed from anywhere through an internet browser, each Time Bank application may include one or more customized solution, or data transfer. Some may be scheduled, for others simply log into your dashboard with your secure password and run Time Bank with the click of a button!

## What our Customers are Saying

"Time Bank's retro average weighted overtime rate solution saves me hours' worth of work of having to do the calculation of looking back for monthly bonuses." - A. Turner, Payroll Accounting Specialist

"I would recommend Time Bank to anyone who needs import/export help. The punch times integration software is very simple to use, and I've never had any issues with the functionality. It saves me both time and money - 5 to 10 hours' worth of work each week." - E. Mizell, HR Administrator

"Your Time Bank solution saves me a lot of time. Two days' worth of work compared to spreadsheets!" - A. Fuksova, Payroll

"Your Time Bank solution works great. It doesn't get any better than just having to push a button!" - L. Berrios, Payroll Specialist

## Time Bank™ Key Features

### RELIABLE AND COST-EFFECTIVE

Eliminates human error with scheduled data transfer or “one click” operations.

Removes costs associated with manual data entry or spreadsheet calculations.

Offers extraordinary value of proven software technology while maintaining the highest standards of product and service quality.

### INVALUABLE DATA VALIDATION

Displays data using the language and format of the connecting systems.

Provides peace of mind with easy validation of results through online data views.

### EASY TO USE

Provides an intuitive look and feel of the dashboard for all levels of Time Bank users.

Includes built-in toolkits for making mapping changes and modifying basic company rules.

Contains online help and tool-tips to guide you through operating Time Bank.

### FLEXIBLE AND SCALABLE

Allows for reconfiguration to expand business rules and accommodate system changes as your business needs evolve.

Supports data exchange with hundreds of systems.

### SECURE

Leverages current Microsoft web-based technologies and up-to-date encryption standards to ensure the security of your data.

Our Time Bank solutions are typically purchased through one of our partners.

With each Time Bank order, our Data Integration Analysts work with you and our partners to provide remote analysis and configuration to meet your unique requirements.

IDI has developed a structured process across thousands of clients that helps streamline the implementation and ongoing support of your Time Bank.
