

Office Practicum is pleased to announce that we have selected Anytime Pediatrics as our official telehealth partner to aid you during this COVID-19 crisis and beyond. We have thoroughly reviewed and vetted their product and determined that they are the best partner to meet the unique needs of our pediatric community.

This partnership has come together at the right time. As COVID-19 has escalated, the government and private payers are not only adjusting rules and regulations to cover payment of telehealth visits but encouraging the providers in their networks to leverage telehealth as a means to limit exposure and spread of the virus.

Consider adopting a telehealth strategy in your office and taking a look at Anytime Pediatrics as a telehealth platform to help you do that. Our team is standing ready to assist you during this pivotal time. Your Client Solutions Manager is available.

Prior to COVID-19 the landscape was already changing where an increasing number of payers had started covering telehealth visits equal to those performed in office. Telehealth had already started to take off becoming an integral part of a pediatric practice. The COVID-19 outbreak has accelerated the need for telehealth solutions, but we also believe that in the long term, telehealth is a practical solution that can be used to address various non-emergent use cases.

Dr. Mick Connors, CEO of Anytime Pediatrics, is a practicing emergency room pediatrician with more than 20 years of clinical experience. In 2016 he founded Anytime Pediatrics with an objective that ensures pediatric patients and their parents could access quality healthcare when they need it with their preferred physician. His passion is to keep the patient cared for within their medical home. Anytime Pediatrics founding and core values are truly aligned with ours and therefore we decided to forge a partnership with them which expands our ability to support our pediatric clients.

Office Practicum and Anytime Pediatrics are committed together in supporting independent practices. We know that a patient's medical home within their local community is where we are going to keep our children healthy and provide them with the best care possible.

Right now Office Practicum is offering Anytime Pediatrics as a non-integrated solution. However, In the coming months, Office Practicum will be integrating with Anytime Pediatrics with a goal to make your experience efficient and seamless.

Please contact your Client Solutions Manager or email solutions@officepracticum.com to learn more. Let us know any way in which we can assist you during this very difficult time.

Recent Testimonial from Dr. George Rogu, RBK Pediatrics

"Anytime Pediatrics has enabled me to offer my patients access to their pediatrician --ME. I have grown weary of patients getting lesser care outside the medical home. Having dabbled with Teladoc, I saw not only how easy this was to offer, but also demonstrated how few patients are reaching out to their own pediatricians. Telemedicine helps me offer minor sick visits, med check, ADHD follow up and so much more. I keep my patients and revenue. My patients get the best care from our medical home, at RBKPediatrics.com."
