

FULLY-AUTOMATED ONLINE PROCTORING

ProctorU Auto is a fully-automated proctoring platform featuring the industry's first AI-powered engine that learns and adapts to test-taker behavior over time. Exam sessions can be viewed in real-time and are recorded end-to-end for faculty review. With 24/7 scheduled and on-demand testing, ProctorU Auto is convenient and secure for institutions and students.

PRODUCT FEATURES

Scheduled or on-demand access, 24/7/365.

The only proctoring platform that gets smarter with each exam proctored.

Multiple face recognition, eye movement tracking, auditory analysis.

The only solution where faculty can view test-takers live during an exam.

Video timeline with incident stamping for easy faculty review.

Live technical support available before and during an exam.

Industry's strongest authentication - ID and photo capture, facial recognition, keystroke analysis.

LTI integration for Canvas and Blackboard.

LIVE LAUNCH

With live launch, a professionally-trained ProctorU proctor guides test-takers through the launch process. The proctor is a live witness for the identity authentication process, secures the test-taker's work station and is available for any live technical support. Live launch gives faculty the peace of mind that test-takers will have a real person to troubleshoot any issues prior to or during an exam.
