Preliminary Preparations
1 | Prepare your environment

- Click here to verify your system compatibility.

- Click here to perform a quick tech check.

- Make sure you have reliable Wi-Fi. It is recommended to connect the computer as close as possible to the router. Also, try to avoid sharing the router network and hotspots.

- Plug your laptop into the power supply. Your computer might consume high CPU because the software runs on your computer’s camera and microphone. Therefore, the battery on your computer can run out faster.

- If you run into network or high CPU issues, close Internet windows and other unnecessarily running apps. Also, consider turning off your camera.
