2. On the Notes tab

Using the Different Worksheet Formats (Views)

There are several views for you to use.

- The Student View format displays a comprehensive checklist of all degree requirements including the specific courses and credit hours needed to fulfill those requirements.
- The Graduation Checklist format displays a simple checklist of all degree requirements; this does not include the individual courses or credit hours specified by each requirement.
- The Registration Checklist format displays all degree requirements that have not yet been completed.

To see your audit in the different formats, select the desired format from the drop down menu then click the View button to the right of the Format box.

Using the What If feature

Accessing the What If feature

The What If feature of Degree Works can be accessed via the links on the left-hand side of the Worksheet tab.

Using the What If feature

The What If analysis is used to see how your previously earned credit would apply to a different degree program. After selecting your potential program/concentration/minor, click the Process What If button next to the Format drop down menu. Before processing the What If, you can also enter courses you plan on taking to see how those would apply to the potential degree program as well by using the "Choose Your Future Classes" section.

Reading the What If analysis results

Once processed, the What-If will look very much like a degree audit. Any planned course will count toward degree requirements progress in the progress bars and will show as PLANNED on the What-If audit.
