Release notes provide the applicable personnel the ability to review enhancements, modifications and regulated changes prior to accepting an update. It is advised that users review the release notes carefully and alert appropriate district staff to changes in Campus.

Questions or concerns regarding an update should be directed to Campus Support.

> Check out the list of New and Updated Documentation for this release.

For additional information platform support, see the Supported Platforms article.

To Do - Admins

- In the Campus.1941 Release Pack (October 2019), Attendance views are being updated to pull directly from the Attendance Day Aggregaton table. Please see the Update to the Attendance Views Release Notification for more information.
- In 2018, new Student Schedule and Walk-In Scheduler tools were made available in the Student Information > Counseling > General toolset. In Campus.1929 (July 2019), those tools replaced the Student Schedule and Walk-In Scheduler available in Student Information > General. **Please verify the appropriate tool rights to the Counseling toolset (noted in the linked articles) are assigned to the staff who need to access these tools.**
- In the Campus.1933 release, two new Employee Self Service tools were made available for districts that use Campus Food Service and Campus Payments. **Verify the appropriate tool rights to the Employee Self Service toolset (noted in the linked article) are assigned to the staff who need to access these tools.**

Calendar

Duplicate Calendar Names (SIS-96446)

Calendar Names must now be unique within a school year. Logic has been updated within the Calendar

Transforming K12 Education®

Attributes tab and Calendar Wizard to prevent duplication of the calendar name.

Calendar Wizard: Before creating a calendar, logic verifies a calendar does not already exist with that name. If that name does not exist, the calendar is created utilizing the specified name label template (e.g., 2018-19 Community Education Co). If that name does exist, the template is modified slightly to a 28 character label with an appended space and numbered 1-9 (e.g., 2018-19 Community Education 1).

Calendar Attributes: When modifying the name of an existing calendar, logic verifies that the name does not already exist. If it does, an error message displays indicating the calendar name must be unique.

OneRoster

OneRoster 1.2 with School Scoping (SIS-120477) (SIS-99950) **[Enhancement]**

With this release, Campus has implemented the OneRoster 1.2 specification, which includes scoping connections by school. The supporting updates to the Learning Interoperability tool will be included in an upcoming release.

This release and subsequent updates position Campus districts to be ready once the 1.2 specification is implemented by vendors. At that point, districts will be able to configure connections using the 1.2 specification, which includes the option to scope connections by individual school. Districts should contact individual vendors to track progress towards implementation.

Staff Food Service and Fee Payments Added to Employee Self Service (SIS-127955) **[Enhancement]**

Two new Employee Self Service tools are now available for districts that use Campus Food Service and Campus Payments.

- **My Food Service** - Allows district employees to add money to their Food Service account.
- **My Fees** - Allows district employees to pay Fees that are assigned to them.

Verify the appropriate tool rights to the Employee Self Service toolset (noted in the linked article) are assigned to the staff who need to access these tools.

Scheduling

<u>Schedule Report Display Options</u> (SIS-126473) **[Enhancement]**

New options have been added to the Schedule Report in System Administration Preferences, and are also available on the Schedule Batch Report when selecting Display Options. These new options include:

- Generated On Date/Time
- Team
- Student Number
- Bus Number
- Homeroom Teacher
- Lunch PIN

The Lunch PIN option requires the new POS Preference of Allow Student PIN to show on printed Student Schedules to be marked.

The printed format has been updated. The header has been streamlined and several of the available options print below the schedule grid of courses.

<u>Walk-In Scheduler Updates</u> (SIS-126723) **[Enhancement]**

The following modifications have been made to Student Schedule and Walk-In Scheduler:

- The total count of students scheduled into a course section was displaying incorrectly in situations where a student begins a course section at a future date. This has been corrected.
- When a course already exists on a student's transcript and that same course exists in the list of Courses Requests or is searched for and attempted to be placed on the schedule, a warning message displays indicating it already exists on the student's transcript. In order for this message to display, the Course Number must exist on the Transcript and the Course must not be marked as Repeatable.
- When restoring an entire schedule, only the most recently ended course sections are restored. If a course was ended in January and another course was ended yesterday, only the course ended yesterday is restored.
- When loading courses to a student's schedule, the Load Rosters modal now includes a Start Date.
- In the Requests Panel, requested courses are now listed by Course Number, then by the type of request (Required, Elected, Alternate). Alternate courses are listed in Request ID order, meaning the course that is first added as an alternate is listed first.

Transforming K12 Education®

- When searching for courses, the entered date remains after adding a course. If an additional course is searched for and added to the schedule, that same date applies to the additional course.
- When adding a course in a future term, the Effective Date field is blank. When adding a course in the current term, the Effective Date field defaults to the current date.

Arizona – Ed-Fi v3.1 Calendars and Calendar Dates Resource Updates (SIS-128685)

The Calendars resource logic has been updated to ensure that any Ed-Fi Calendars records that exist in the ODS for a school are not deleted.

The Calendar Dates resource logic has been updated to ensure that any Ed-Fi Calendar Dates records that exist in the ODS for a school are not deleted.

This issue affects all districts that submit Calendars data for schools that are shared between multiple districts, including Tuition Out calendars. Without this update, Calendars data for Tuition Out schools will be overwritten by other districts, and your district will in-turn overwrite other district's Calendars submissions.

After taking this update, perform a resync for any Calendars and Calendar Dates resources that have not landed successfully at ADE.

Texas – 2019-2020 TREx Updates (SIS-126104)

The following updates were made to the TREx Extract:

- The following elements were added:
  - Alternative Language
  - Student Language
  - Home Language Survey Date Administered
- The Dual Language Immersion complex type was added. This contains the following new elements:
  - Immersion Year
  - Immersion Language
  - Assessment Met Date
  - Completion School Year
- Logic for LEP has been updated so that if the EL Program Status (as of the extract date) has a value of 'Exited EL' and the current date is after the Fourth Year Monitoring date, a value of 5 is reported.
- The Language element has been renamed to 'HomeLanguage'. All existing logic remains the same.

The Home Language Survey Date field has been added to the Demographics tab.

The Performance Acknowledgement AP IB Exam and Performance Acknowledgement College Readiness Assessments code tables has been updated to meet 2019-2020 state requirements.

The TREx Extract editor has been updated so that a student's Enrollment End Status is not visible nor are users able to enter this value.

Virginia - Student Record Collection (SRC) Update (SIS-125863)

The Student Record Collection was updated to report a student's enrollment when ALL of the following criteria are met.

- No Show is marked.
- Enrollment End Date is before the first instructional day and on/after the Calendar Start Date.
- The student does not have an active enrollment
  - after the enrollment marked as No Show, and
  - on/before the report generation Snapshot Date.
    If the student has an enrollment(s) not marked No Show after the enrollment marked as No Show and the enrollment Start Date is before or on the report's Snapshot Date, Campus reports the enrollment marked as No Show and one record for any enrollment that occurs before you generate the report.

The following corrections are included in Rx Packs for August 2019. Rx Packs contain a small number of critical cases to fix urgent issues, with delivery in an immediate time frame (e.g., the fix cannot wait for the next four week Release Pack).

It is recommended that customers apply all subsequent Release Packs immediately following Rx Packs. Doing so will benefit both customers and Infinite Campus when it comes to supporting the patch.

Rx Packs are cumulative; each Rx pack will automatically include all previous Rx packs within that release. These cases will also be included in the Campus.1937 pack unless otherwise noted.

Below is a list of all Rx Packs for Campus.1933 and the date of availability:

SIF and SRI Days Present Field Updated to Calculate to Hundredth of a Day (SIS-127688)

Logic for the Days Present field in the SRI Data Collections Extract has been updated to calculate to the hundredth of a day. New logic is as follows:

- From across all periods with "Instruction" = Checked in instructional days up to and including the extract Effective Date:
    - Find the total hours available in each instructional period, rounded to the nearest hundredth (.01).
    - For each period in which the student was marked Absent, Not Exempt:
        - Subtract the hours (rounded to the hundredth) for the period from the student's total daily attendance.
        - Lunch minutes are subtracted from the total hours calculation for the applicable period.
    - Days Present = SUM((total instructional hours in day - students absent hours) / total instructional Hours in day) (rounded to the hundredth). Report to the hundredths of a day in format 0.00 to xxx.00

Logic for the following SIF elements was updated to calculate results to the hundredth of a day:

- StudentAttendanceSummary/DaysAttended
- StudentAttendanceSummary/ExcusedAbsences
- StudentAttendanceSummary/UnexcusedAbsences

The SIF StudentAcademicRecord/ReportingDate element has been updated to now report the current date (the date the record was prepared).

Also, population logic for the SIF SchoolCourseInfo/SectionProvider element has been updated to the following:

- When (Scheduling>Courses>Course>Institution Providing Section) NOT = null, report the code selected.
    - When a 4-digit code is selected, reports District Code + "0000". Otherwise, reports 6 or 8 digit code selected.
- When (Scheduling>Courses>Course>Institution Providing Section) = null, report the attribute Default Value when it exists.
    - When the field is null and no valid attribute Default Value exists, report the District Number+0000.

SD and PD records in the State Format were incorrectly having a 3 appended to the end of the record. This issue was corrected.

The SIF StudentSchoolEnrollment/EntryType/OtherCodeList/OtherCode element has been updated to report the attribute Default Value mapped to the State Start Status when the database is null.
