Academic Programs

Academic Planning Compound Requirements, Student Progress Display (SIS-125010)

When a Compound Requirement entry for a Graduation Program only had a Career Tech Requirement entry but did not include a course or test, the student's Progress tab was not allowing the expansion of the Compound Requirement section. This has been corrected.

Ad hoc Reporting

Scheduling - New Ad hoc View for Use with Complex Calendar Structures (SIS-120568)

A new view has been added that can be used to return student schedules in calendars that have multiple term schedules and multiple period schedules.

This new view, called Full Section Schedule, is located in the Learner > Schedule > Course/Section area and is available in the Data Viewer and Filter Designer when creating Student Filter Types.

Article: Schedule (Counseling)

Path: Ad hoc Reporting > Filter Designer > Query Wizard

Ad Hoc Today Filter Added (SIS-124688) **[Enhancement]**

A "Today" filter option has been added to the Ad Hoc Query Wizard.

Path: Ad hoc Reporting > Filter Designer > Query Wizard

Ad hoc Reporting - Grades, Term GPA Summary Sub-reports (SIS-125132)

Attendance

Attendance Wizard - Tardy with NULL Present Minutes (SIS-114047)

When a student was checked out in a period with an Attendance code of Tardy and there were no (NULL) Present Minutes, the Check Out did not save. This has been corrected. A Check Out in the passing time between periods when the earlier period has a Tardy and NULL Present Minutes also saves as expected.

When a student is checked out from a period where there is an attendance code of Tardy and the present minutes are saved as NULL, the calculation of present minutes uses the time from the Check Out to the end of the period, minus lunch minutes, if applicable to the period.

- If Present Minutes are entered for the period, the calculation of new Present Minutes uses the saved value. The total minutes from the Check Out to the end of the period, minus lunch minutes, is subtracted from the existing Present Minutes.
- If the resulting number of Present Minutes results in a negative number, the Check Out code and timestamp are saved but the Present Minutes report as zero. The Check Out code and timestamp are also applied to all subsequent periods.

This does NOT affect Kentucky Attendance.

Attendance Letters (SIS-125201)

Users were unable to reprint previously printed letters. This has been corrected.

Additionally, after taking the Campus.1909 Release Pack, Attendance Letters that were generated with the Allow Letter Requalification option did not record the qualifying date in the Attendance Letter History table. For students who requalified for a letter multiple times, the most recent letter for those students who qualified during that time may not generate with the most recent dates. Generating these letters again will begin to address these records.

The Federal Programs Publishing Tool has been relocated to live under Program Admin in the index. Existing tool rights and user groups with rights to the Federal Programs Publishing Tool have been converted to apply to this new location.
