Release notes provide the applicable personnel the ability to review enhancements, modifications and regulated changes prior to accepting an update. It is advised that users review the release notes carefully and alert appropriate district staff to changes in Campus.

Questions or concerns regarding an update should be directed to Campus Support.

Check out the list of [New and Updated Documentation](#) for this release.

For additional information platform support, see the [Supported Platforms](#) article.

To Do - This Release

- New content is available on Emancipated Students. You can read the [Knowledge Base article](#) or [watch the video](#). Please forward to staff responsible for managing Census data.
- The Academic Progress Planner HTML field is NOT available in Campus Student/Campus Parent. Because of this, it is being removed from the [Portal Display Options](#) in a future release. If you have text in this field that displays on the existing Parent Portal, please consider moving this text elsewhere.

Multi-Score Editor (SIS-123359) [Enhancement]

This release includes a new version of the Multi-Score view, which greatly improves the usability and appearance of this tool. Accessed through the Score button on an assignment or through the Multi-Score link in the Grade Book, this tool is used to score assignments with multiple grading task/standard alignments.

Updates help teachers score assignments more quickly, including a simplified display of rubric score options, enhanced fill options, and a Rapid Scoring view with improved keyboard navigation.

Campus Learning

Campus Learning - Discussions (SIS-121497) [Enhancement]

Extensive updates have been made to the Discussions tool to improve and expand this option.

- Teachers can now create discussions in the context of an assignment and easily score student responses.
- Creating discussions has been simplified to remove complex moderator options.

- The existing Discussions tool displays both discussions aligned to an assignment and non-assignment discussions.
- Students can view and respond to discussions through the Campus Student app.
- Questionable content can be flagged by students or teachers and resolved by teachers or admins.
- The System Administration version of the tool has been simplified to allow admins to review existing discussions and resolve flags if needed.

Discussions is part of the Campus Learning premium offering.

Returning Edit Rights to a Google File (SIS-123627) [Enhancement]

The option to return edit rights to a student for a submitted Google Drive file has been moved to the Submissions list in the submission scoring screen. From here, teachers have the option of modifying the type of access the student has to their submitted assignment file, either View or Edit. Changing edit rights does not affect the state of the assignment, it simply modifies the student's access rights through Google. Teachers can use this option to give students access to their files to make updates prior to final grading. This option only displays for assignments that have Google Drive enabled.

Additionally, the Student Comments and Teacher Feedback fields that were previously on the old scoring view for submissions have also been moved to this Submission list as well. These comment fields are available for students to ask questions about the assignment to which teachers can respond, prior to the assignment being submitted. This feedback is different from assignment comments.

DIS/SIF

SIF Updated to Send Change and Delete Messages for Staff/Students when Add Person and Combine Person Tools are Used (SIS-114204)

SIF functionality has been updated to properly send change and delete messages for staff and students when the Add Person and Combine Person tools are used. Updates are as follows:

- When a District Assignment record is added for a staff member for the first time, a SIF StaffPersonal and StaffAssignment ADD event is provided.
- When a District Assignment record is updated for a staff member or an additional District Assignment record is added, a SIF StaffPersonal CHANGE event is provided.
- When the last District Assignment record is deleted for a staff member, a SIF StaffPersonal DELETE event is provided.
- When two students are combined using the Combine Person tool, a DELETE event is sent for all objects related to the discarded (merged record) person's Staff or Student (or both) RefId:
 - For students:
 - StudentPersonal
 - StudentSchoolEnrollment

- StudentSectionEnrollment
- StudentContact
- StudentSectionMarks
- StudentContactRelationship
- StudentDailyAttendance (Delete only)
- StudentPeriodAttendance
- StudentActivityParticipation
- StudentParticipation
- StudentScoreSet
- For staff:
 - StaffPersonal
 - StaffAssignment
- When the Combine Person tool is used to combine two person records, the primary, non-discarded person will generate a CHANGE event for the following SIF objects, which depend upon whether the person is a student or staff member (or both):
 - For students:
 - StudentPersonal
 - StudentSchoolEnrollment
 - StudentSectionEnrollment
 - StudentContact
 - StudentContactRelationship
 - StudentPeriodAttendance
 - For staff:
 - StaffPersonal
 - StaffAssignment

SIF CalendarDate Logic Updated to Properly Send Add/Delete Events (SIS-117298)

Logic for the CalendarDate object has been updated to the following:

- The object will populate a record for each day where:
 - The data exists in the database.
 - A modification to any field on the Day Detail editor has been made and saved to the database.
 - The object will report 1 instance per unique day across all schedule structures assigned to the calendar.
- The following elements within the object were updated as follows:
 - StartDate
 - Logic reports the first CalendarDate date (the first day that exists in the database).
 - EndDate
 - Logic reports the last CalendarDate date (the last day that exists in the database).
 - FirstInstructionDate
 - Logic reports the earliest day in the calendar where Instruction = Checked.
 - LastInstructionDate
 - Logic reports the latest day in the calendar where Instruction = Checked.
 - CalendarSummary SIF_Events
 - When a day is added to the database, or any modification (change or delete) is made to a day, the CalendarSummary object must report a change event and update the StartDate or EndDate as necessary.

SIF StudentDailyAttendance Logic Update (SIS-121483)

Logic for the SIF StudentDailyAttendance object has been updated to include the following:

- When a student's enrollment End Date is entered, a delete event is provided for each period on and between 1 day after the student's enrollment End Date AND the calendar End Date for each day WHERE the student had any period attendance Code OR Status entered on their Attendance tab.
- Delete events are now sent when attendance no longer exists in the Campus database.
 - If Enrollment End Date is populated and a new Start Date is entered, previous Attendance is deleted
 - If Enrollment End Date is NOT populated and a new Start Date is entered, previous Attendance data is not deleted

Ed-Fi

Ed-Fi - New Ed-Fi Configuration Tool (SIS-119291) [Enhancement]

In preparation for the Ed-Fi 3.1 version for the 2019-20 school year and for future improvements to the Campus Ed-Fi tools, the Ed-Fi Preferences and Ed-Fi Config tabs have been combined into one Ed-Fi Configuration tool.

In order for data to flow from Campus to Ed-Fi, code mapping was completed in the Campus Attribute Dictionaries in a column called 'Ed-Fi Code' that allowed for Campus/State code values to be translated into what Ed-Fi would accept. Fields like Ed-Fi Term Type and Grading Periods were also added to areas of the product to accomplish the same thing. Our goal with the new Configuration tool is to provide users more visibility into what is being mapped and also give users more control on how the data is sent.

This project is ongoing and you will continue to see changes to the Ed-Fi Tools over the next few months. Please review the documentation in the Campus Community for complete details of what has changed.

Forms

Custom Forms Documents Tab Updates (SIS-122961) [Enhancement]

Several updates have been made to the Documents tab when filling out a custom form for a student:

- The Name of the form and Instructions entered by the form administrator now display at the top of the screen.
- A warning icon  in the upper right corner indicates to the user that the form contains errors. Clicking on the icon navigates the user to the field with the error. When all errors are fixed, a checkmark icon displays.
- Hover text displays when hovering over fields with errors to provide the user with additional information concerning the error.

- A Comments column has been added to the Master Transcript Screen. For longer comments, only a portion of the comment may display, but when hovering over the field, the entire comment displays in the pop-up text.
- Padding between columns on the Master Transcript Screen has been reduced. A horizontal scroll bar may display for smaller screen/monitor sizes.
- The Edit, Cancel and Save buttons have been replaced with icon buttons.
- The Credit Type field sorts as follows:
 - Credit Groups and Standards associated with the selected School name on the Transcript Record sort first. These are selected on the School Standards tool (System Administration > Resources > Resources > School Standards).
 - Credit Groups and Standards not associated with the selected School name follow, and include a label of NOT IN USE.
 - When entering transcript records by typing in the School field (not selecting options from a dropdown list), Credit Groups and Standards display as they would if they were chosen in the School Standards tool.

Massachusetts – EPIMS Work Assignment FTE Logic Updates (SIS-122225)

The FTE Percent field on the District Employment tab has been renamed to 'FTE Percent (whole number 0-100).

Logic for the Full Time Equivalent field on the EPIMS Work Assignment extract has been updated to the following:

- When a staff is reporting one record on the extract and is not assigned to a section, the FTE is reported as follows (non-HR districts only):
 - (District Assignment FTE *District Employment FTE)

- Example:
 - Staff has a single WA record.
 - District Assignment FTE = 0.01
 - District Employment FTE = 1
 - Expected Result: $0.01 / 1 = 0.01$
- When (Census > People > District Employment > FTE Percent = "1"), logic considers it as 1 for calculation purposes and not 100 (non-HR districts only).
- When (Census > People > District Assignments > FTE of Assignment = "0.01"), logic considers it to be "0.01" for calculation purposes (non-HR districts only).
- When the Job Classification field has a value of 2305, 2306, 2307, or 2308, and the Term Status field has a value of 02, the Full Time Equivalent field must be divided by the number of section records belonging to the same district assignment, (where Course Term = 01) plus the number of sections with a Term Status = 02 (HR and non-HR districts).
 - Example:
 - District Employment FTE = 100
 - District Assignment FTE = 1.0
 - There is one section record that has WA07 = 2305, 2306, 2307, or 2308, AND WA17 = 02
 - There are 3 section records that have WA16 = 01
 - Expected FTE result: $(100/1.0) / (3 + 1) = 0.25$
- When a Work Assignment record has a Term Status = 01:
 - The Full Time Equivalent calculation is divided by only sections that belong to the same district assignment (Job Classification and Teacher Paraprofessional Assignment match) that also have a Term Status = 01.

Texas – TSDS Submission 3 Updates (SIS-116266)

The following updates were made to the TSDS Education Org Calendar Interchange:

- The TX-InstructionalProgramType to ReportingPeriodExtension complex type has been added.
- The ReportingPeriodExtension > TX-InstructionalTrack field has been updated to report 2 digits (zero pad from the left if necessary).
- Logic for the CalendarDateExtension > TX-SchoolDayOperationalMinutes field has been updated to only report for Instructional Program Types of 01 or 02.
- The TX-SchoolDayInstructionalMinutes field has been added to the CalendarDate Extension complex type.
- CalendarDateExtension > TX-SchoolDayInstructionalMinutes field has been added and will report when Instructional Program Type is equal to 04,05,06,07,08,09,10,11,12

The following updates were made to the TSDS Student Program Interchange > StudentTitlePartAProgramAssociationExtension - Submission 3

- The following field were removed:
 - TX-TitlePartAServices
 - TX-TitlePartAReadingIndicator
 - TX-TitlePartAMathematicsIndicator
 - TX-TitlePartAScienceIndicator
 - TX-TitlePartASocialStudiesIndicator
 - TX-TitlePartASupportServices
 - TX-GuidanceCounselingServices
 - TX-SocialWorkServices
 - TX-HealthServices

The following updates were made to the TSDA Student Discipline Interchange:

- Logic for the TX-LEPIndicator field has been updated to the following:
 - If student has an ESL/Bilingual Program that is active on the incident date (or has an F/S/3/4 code and the incident date is equal or prior to the Fourth Year Monitoring date) AND an active and locked IEP, report code in LEP field as outlined below.
 - LEP: report 1
 - Exited LEP: if date is prior to First Year Monitoring date - report F
 - Exited LEP: if date is after First Year Monitoring date, but prior to Second Year Monitoring date - report S
 - Exited LEP: if effective date is after Second Year Monitoring date, but equal or prior to Third Year Monitoring date - report 3
 - Exited LEP: if effective date is after Third Year Monitoring date, but equal or prior to Fourth Year Monitoring date - report 4
 - Not LEP or NULL: report 0
 - Student must be SpEd to report LEP in Submission 3.

The TX-ProgramEvaluationType has been added to the SectionExtension complex type on the TSDS Master Schedule Interchange.

The TX-InstructionalTrack field on the TSDS Student Attendance Interchange has been updated to left zero pad to ensure 2 digits are always reported.

The PK Program Evaluation Type field has been added to the Section Editor (Scheduling > Course/Section > Section > Section Editor)

Vermont

Vermont - SLDS Extract Logic Updates (SIS-122550)

The following changes were made for SLDS reporting.

- A new checkbox called "Tuition Student" was added to the State Reporting Fields section on the Enrollments tab. Students who have this checkbox marked, are included on the 2_TS_Stu_ADMByEnrollingOrg extract and the 0_Student Identity extract on the Tuition Student Official (05) Submission. These students are excluded from all SLDS reports except for the 0_Student_Match and 1_TS_OrgLevel.
- Logic for the ENROGID field on the 2_TS_Stu_ADMByEnrollingOrg extract was updated to report from Enrollments > State Reporting Fields > New Place of Enrollment.
- Logic for the POSFTE field on the 11_POS extract was updated to report from District Assignments > Employment Assignment Information > FTE of Assignment. If the staff person has multiple assignments at one location, the FTE of Assignments are added together. 100% now reports as "1".
- Logic for the 11a_POS_RoleTable extract was updated. The EmpOrgid for all staff members that

have the Title "109: SPED Ungraded Teachers" or "112: SPED Paraprofessionals now report the ADMINID (State District Number) for the EmpOrgid and not the Organization ID. 100% now reports in the Role Percent field as "1."

- Logic for the following fields on the 4_PS_Enroll extract were updated.
 - NTRESNO now reports the Homeless Code if selected.
 - NSLELG now reports the Free/Reduced Code if selected.
- Logic for the following reports was updated to not include staff members if their District Assignment is marked as Exclude: 0_Staff_Identity, 11_POS, and 11a_POS_RoleTable.
- The 17_CIRS_Offenders report was updated to report the student's State ID Number in the off_IDNUM field.
- If a report has no student/school data reporting, the column headers for the report are still reported.
- Logic for the 1_TS_OrgLevel report was updated to only include students that have a funding source = 01: Operating School District (State Reporting Fields > Funding Source).

Wisconsin IEP Updates (SIS-123186)

Several small changes have been made to the Wisconsin IEP:

- A typo on the header that prints on all pages related to the P-1 editor has been fixed. This has been changed on both the 2018.2 and 2018.3 print formats.
- An issue with the sequencing of the goals on the I-6 Interim Review Progress Report editor has also been resolved. This was also impacting the print format, which has also been fixed.

There was an issue with the ISP pulling the Special Ed Setting from the Enrollment Tab instead of the SPED Setting Tab, which was causing the Caseload Summary Report to report incorrect information. This has been resolved.

The following corrections are included in Rx Packs for January, February, and March 2019. Rx Packs contain a small number of critical cases to fix urgent issues, with delivery in an immediate time frame (e.g., the fix cannot wait for the next four week Release Pack).

It is recommended that customers apply all subsequent Release Packs immediately following Rx Packs. Doing so will benefit both customers and Infinite Campus when it comes to supporting the patch.

Rx Packs are cumulative; each Rx pack will automatically include all previous Rx packs within that release. These cases will also be included in the Campus.1909 pack unless otherwise noted.

Below is a list of all Rx Packs for Campus.1905 and the date of availability:

- Rx Pack Campus.1905.7 - Tuesday, March 12, 2019
- Rx Pack Campus.1905.6 - Thursday, February 28, 2019

Assessment

Records Transfer – Assessment Import Failing to Import All Data Causing Sync to State to Null Fields Containing Data (SIS-122258)

The Records Transfer tool was incorrectly importing only data for fields existing in the Assessment Import UI and not all of the additional information that exists in the XML message sent from the releasing district. Importing the record as generating a DIS event sync message back to the State Edition and thus, updating and overwriting data existing at the State with this missing (null) data. This issue has been corrected. All fields from the releasing district's XML file will be imported and if a test is either a state or national test and is locked, a DIS event message will not be sent. If the state or national test is not locked, a DIS event message will be sent but the State Edition testScore.districtID and testScore.schoolID values will not be updated.

Assessment Publishing and Syncing Logic Update (SIS-120305)

The following logic used for publishing Test Structures and Test Score data from State Edition to District Edition has been updated:

- Publish Test Structure:
 - Only display tests that meet the following when a school year is selected in the Campus toolbar:
 - Test Year is set to the same school year in the toolbar
 - Test Year is blank
- Publish Test Scores
 - Only display tests that meet the following when a school year is selected in the Campus toolbar:
 - Test Year is set to the same school year in the toolbar
 - Test Year is blank
 - All test score data will be synced from State Edition to District Edition (parent, child, grandchild, etc), not just the parent test score record.
 - Logic will look at the selected school year in the Year field
 - If the assessment has years set and it matches the selected school year, send all test score records.
 - If the assessment has no year, verify the test score data has a date range of 7/1/XX – 6/31/XX that matches the selected school year. If any child(ren) test are missing a date, look at the parent test to verify the date.
 - If the test score record(s) does not have a date, look if the assessment has an end year that matches the selected school year. If it has no assessment end year, do not send the test score data.
 - When the correct testScore records have been identified, look at the student enrollment that matches the school year and then look at all of the student enrollments for that year and future years. Logic will then gather the districtID's from each enrolled district. When publishing the testScore record, logic will publish to each of the districts the student was enrolled at.
 - Assessment scores being published to the District Edition will do an insert of data if they do not already exist.
 - Assessment scores that have been synced from State Edition to District Edition and then deleted from the State Edition and then test scores published to the District Edition, test

scores for the deleted tests are removed from the District Edition.

Logic for syncing assessments from the District Edition to the State Edition has been updated to the following:

- Logic will determine what test scores will sync based on the selected school year and active DIS zone year.
- All test score data will be synced from District Edition to State Edition (parent, child, grandchild, etc), not just the parent record.
- Logic will look at the selected school year in the Year field and assessments that are defined as a State or National test that have been published down from the State Edition:
 - Logic will verify that test score data has a date range of 7/1/XX – 6/31/XX that matches the selected school year.
 - If the test score record(s) do not have a date, logic will look to see if the assessment has an end year that matches the selected school year.
 - If the assessment end year is blank and the parent test score record does not have a date, the test score record(s) will not synced to State Edition.
 - Assessment scores for the selected school year will be synced to State Edition and will do an insert of data if they do not already exist.
- If test score data that has already been synced from District Edition to State Edition and the test score record(s) get deleted in the District Edition, they will be deleted from State Edition as well.

Logic for batch syncing assessments from District Edition to State Edition has been updated as follows:

- Logic for determining what test scores are synced is based on the selected school year and active DIS zone year.
- All test score data will be synced from District Edition to State Edition (parent, child, grandchild, etc), not just the parent record.
- Logic will look at the selected school year in the Year field and assessments that are defined as a State or National test that have been published down from the State Edition:
 - Logic will verify that test score data has a date range of 7/1/XX – 6/31/XX that matches the selected school year.
 - If the test score record(s) do not have a date, logic will look to see if the assessment has an end year that matches the selected school year.
 - If the assessment end year is blank and the parent test score record does not have a date, the test score record(s) will not synced to State Edition.
 - Assessment scores for the selected school year will be synced to State Edition and will do an insert of data if they do not already exist.
- If assessments that have been synced from District Edition to State Edition get deleted in the District Edition, a new batch sync is run and test scores deleted in District Edition are removed from State Edition.
- Logic only look five levels deep on test structures.

Logic for Records Transfer has been updated so that when a district uses the Assessment Import Wizard, the DIS message sent to the State Edition does not overwrite existing records for tests that are State or National, locked or unlocked.
