

# Adaptive Reporting

Tricefy

Tricefy Adaptive Reporting allows users to design their own custom templates so that your documentation needs are fully met. Automatically have your Ultrasound measurements transfer to fill the fields in your templates. Review. Finalize. Done.

Reporting Template tools to help your practice adapt and always be future ready:

## Template Editor

- Design your own templates or opt-in to have your Tricefy team create them for you.
- Customize your reporting template with a variety of field type options, including snippets and dropdown selections.
- "Smart Groups" feature for quick template additions as you work.

## Template Library

- Select from a library of popular pre-created templates.
- Collaborate with the Tricefy Reporting network to share templates and obtain new ones.
- Consistent template updates for OB/GYN, Cardiology, and many more.
- Add your own tailor made reports.

## Simplify your Reporting workflow in 4 easy steps

Tricefy helps healthcare professionals to efficiently complete their scan documentation.

### 1 Select

the unread study in Tricefy PACS.

### 2 Pair

the unread study to the procedure template.

### 3 Review

the generated report, add impressions or dictate into text fields.

### 4 Finalize

the report with your real signature and autosend to EMR.
