

Focus on what matters most with a simplified, centralized and unified workflow.

## Tricefy with GE Healthcare's ViewPoint 6

Seamlessly integrate with GE Healthcare's ViewPoint 6 to further enhance and streamline your workflow. Enabling sharing, collaboration, routing and remote access with one-click from your ViewPoint 6 workstation.

### Share: instantly with patients

Enhance patient experience by sharing high-quality images, videos and reports directly from ViewPoint 6 to their mobile devices. Patients can share with family and friends with the Tricefy Mobile App, leveraging integration with social apps.

### Access: remotely without compromise

Automatically duplicate your ViewPoint 6 studies in Tricefy. Image quality and cines are uncompromised enabling remote reading and viewing. Access studies from anywhere, anytime, with any device.

### Collaborate: efficiently with colleagues

Share outside your network right from your ViewPoint 6 workstation. Cloud enables real-time collaboration with referring physicians, outside providers, scholars and industry professionals for a second opinion, research, or education.

### Route: automatically between facilities

Streamline image and data transfer while improving communication and collaboration. Route exams between ViewPoint 6 servers, PACS, and from non-ViewPoint users into your facility.
