

Campsite Policy Changes

Life Science (Lower Middle)
Unit 4

Campsite Policy Changes

1. All cabins near the stream were sprayed with insecticide last fall to get rid of mosquitos.
2. The dining hall switched from using peanut butter to using sunflower seed butter to accommodate the growing population of scholars with peanut allergies.
3. New signs were posted next to the ponds to prohibit any swimming during camping season.
4. The forest was cleared to accommodate ten new cabins for campers to stay in starting next summer.
5. The campsite started buying organic ingredients for the s'more making activity.
6. Compost piles were created a mile away from the main hall to cut down on the amount of waste thrown away each night by campers.
7. The camping season was elongated to include the months of April-October.
8. Removal of the wolf population started in December.
9. A new water conservation system only allows hand washing for 30 seconds.
10. More recycling bins were added outside each cluster of cabins.
