Special Ed Updates (SIS-125227)

Updates to the Student Information and Enrollment Status editors for all states were made in order to align the information retrieved when creating or refreshing the editor.

For Plans outside of Minnesota and Kentucky, only current and future primary enrollments are initially considered. N: Special Ed Services enrollments are considered ONLY if a P: Primary enrollment does not exist. A current enrollment is defined as the Enrollment where the Start Date of the plan falls within the Start and End Date of the Enrollment. If the Enrollment record does not have an End Date, the calendar End Date is used. Future Enrollments are considered when no current enrollment exists or either the entire plan, or End Date of the plan, falls within the Enrollment Start and End Date. If there is more than one Enrollment that meets the criteria, Enrollment will be further sorted by latest End Date and latest Created Date. Evaluations follow the same logic as plans. However, since most do not have an End Date, when there is no current Enrollment, a future Enrollment will be pulled whether or not it overlaps with the Evaluation.

For Plans in Minnesota and Kentucky, only current and future Enrollments are considered. Active Courses vs. Dropped Courses - Inconsistency in Date Logic (SIS-122433)

Date logic has been modified for the display of active courses vs. dropped courses in Student Schedule Reports and Responsive Course Offerings.

An Active Course is defined as a course that is not yet dropped, which has one of three impacts, depending on the context of the course:

- If the course met in a previous term, "active" means the roster placement for the student either has a blank (null) end date or the end date is the last date of the term.
- If the course meets in the current term, "active" means the roster placement for the student either has a blank (null) end date or the end date is greater than or equal to the current date.
- If the course meets in a future term, "active" has no real meaning, as all future courses are considered active regardless of the start or end date.

Options have been added to schedule report formats to display or not display Responsive Courses on printed schedules (Responsive Courses do not automatically display). Responsive courses follow the same logic for Active vs Dropped as outlined above.
