(B) Census and examination findings

EU | | | | | | Cluster | | | | | Household | | | | Recorder | | | |

List all household residents. Ask for consent to examine everyone aged 1 year or more. Mop-up should focus on 1–9 year-olds.

Name	Sex 1 = M 2 = F	Age (years)	Examined? 1 = Yes (with consent) 2 = Absent 3 = Refused 4 = Other	Right Eye 0 = Sign absent 1 = Sign present 2 = Not able to grade					Left Eye 0 = Sign absent 1 = Sign present 2 = Not able to grade					Additional notes
				Trichiais *		TS**	TF	TI	Trichiais *		TS**	TF	TI	
				Upper Eyelid	Lower Eyelid				Upper Eyelid	Lower Eyelid				

* Where trichiasis is present, additional management questions will be asked.
The grader should also look for evidence of a surgical scar to validate the health management question responses.
** Graders will only examine for TS where trichiasis is found to be present.
