

Grow the skills to build the future

With Pluralsight Skills, you can align your technology strategy to a skills strategy that moves you forward faster.

The clarity you need to lead

- Index your team's skills with Skill IQ
- Upskill employees into modern tech roles with Role IQ
- Align skill development to your objectives with insights into skills, roles and skill progress over time

The skills to deliver faster

- Give teams unlimited access to our network of 1,500+ authorities on cloud, microservices, machine learning, Agile and more
- Close skill gaps faster with personalized learning recommendations from Iris
- Harness the expertise of senior team members at scale with Q&A

Succeed ahead of schedule

- Enable tech teams to be more reliable, adaptable, scalable and secure
- Speed up release cycles
- Increase efficiency so you can deliver innovative products to customers faster

“Before we started using Pluralsight, we found it very difficult to keep our team focused on new technologies. We found it difficult to do anything new and we just spent a lot of time learning our way or trying to figure things out. However once we started getting everybody into these videos, we saw the development times go down, the quality go up, and the teams working together better.”

— Daniel Porrey, Sr. Director of IT Application Development
