

Billing Engine Release Notes 6.2.2

Patch Release

Billing Engine Version 6.2.2 Release Notes

All content is subject to change.

Release Date: July 18, 2021

Resolved Issues

Issue: Elapsed time was rounding incorrectly in the Services Form. *Navigation Form > Services button*

Resolution: The calculation for Elapsed Time is corrected so that the time accurately reflects the time between Start Time and End Time.

Issue: An error was preventing users from using add-on codes in the Services Form. *Navigation Form > Services button > Defaults button*

Resolution: Users can now add a code using the Services Form.

Issue: Any client who was enrolled in multiple Programs was listed in the client search multiple times.

Resolution: Corrected search so that each client is listed only one time.

Issue: The Billing Properties window was not opening when the Billing Properties button was clicked. *Navigation Form > Services button > Billing Properties button*

Resolution: The Billing Properties window now displays as expected.

Issue: The Save button on the Client Master Form was not active for a user to select. *File > Client > Client > Client Master*

Resolution: Save functionality has been restored so that a user can click the Save button when changes are made.

Issue: In 837 files of Format Type 37, the Tax ID segment was listed twice and the first instance was missing the Tax ID. *Navigation Form > 837 Form button*

Resolution: 837s have one correctly formatted Tax ID segment.

Issue: When attempting to run a Transaction Report, a Program Error window was displayed and the report would not run. *Reports > Billing Reports > Transaction Reports*

Resolution: The Transaction Report runs as expected without error.

Issue: An internal error occurred when users attempted to click GET SERVICES on the Recurring Services Form.

Resolution: GET SERVICES now returns the Services the user is attempting to add.
