

Billing Engine Release Notes 6.2.4

Patch Release

Billing Engine Version 6.2.4 Release Notes

All content is subject to change.

Release Date: August 29, 2021

Resolved Issues

Issue: A pop-up window repeatedly appeared during posting an 835 file that required a biller to enter a Party Type.
Navigation Form > 835 Form > Start button > EDI Folder > 835 Folder > Select 835 file > Ok button

Resolution: The pop-up window requiring Party Type is displayed once for each 835 file.

Issue: Errors were being generated when using the Auto Fill Dates in the Attendance Form. *File > Services > Attendance > Attendance - Detail Grid*

Resolution: The Attendance Form is now working as expected without error.

Issue: The 837 was creating a Claim Header using the following fields combined: Agency ID, the Invoice Date and the client's Case Number. This created a long confusing Claim Header in the claim file.

Resolution: A configuration option was added to use Case Number as Claim Header. To use this option and restore previous functionality anyone with a Security Level of Supervisor can navigate to: **Maintenance and Setup > Configuration Options > System > CTB > Page 4** and select the Use Case Number as Claim Header checkbox.
