Meeting Hub Release Notes
Version 2.0.2

StrataMax has been dedicated to meeting the needs of Strata Managers for over 20 years through the continual enhancement of our software suite. We are committed to providing new functionality to support you in servicing your clients and to provide opportunities for you to optimize efficiency within your office environment.

This document describes exciting new features and enhancements available in the above release.

A history of Release Notes can be reviewed on the StrataMax Online Help

THE COMPLETE STRATA MANAGEMENT SOLUTION

StrataMax StrataCash TRATAPAY

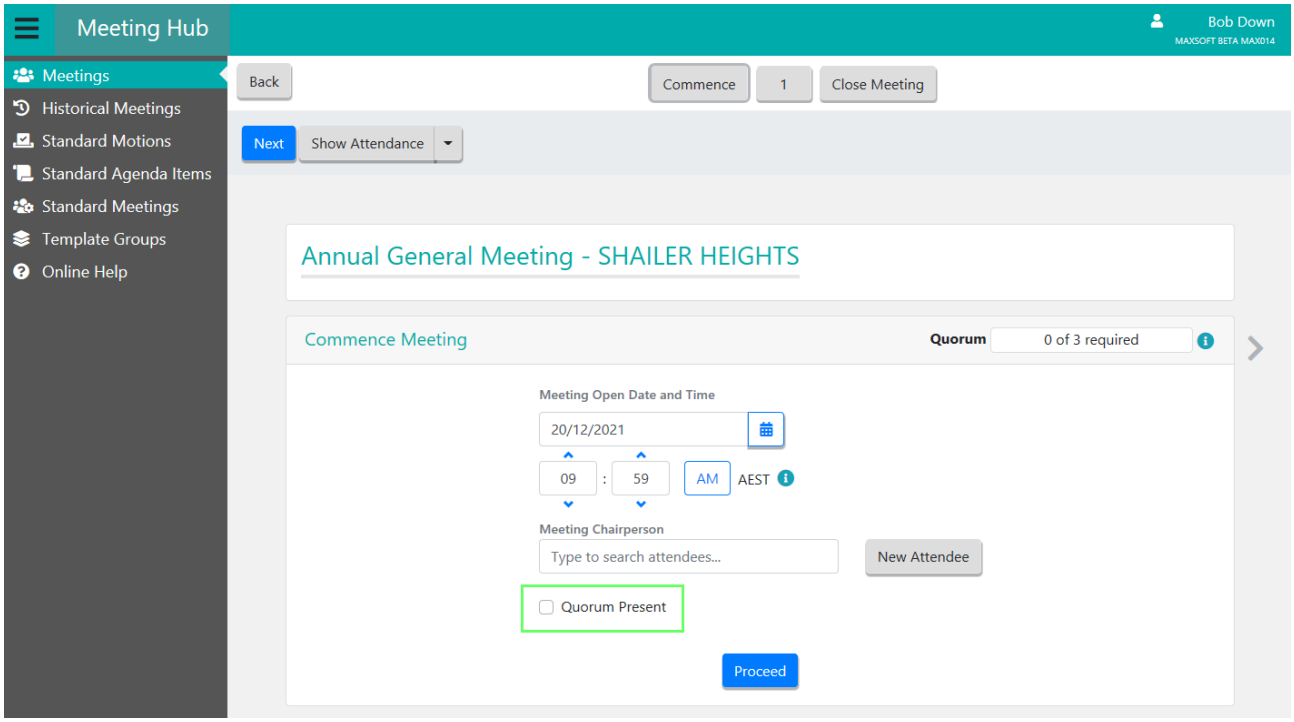
What's New....3
1. Quorum Present Checkbox....3
What's Better....4

What's New

1. Quorum Present Checkbox

The quorum indicator in Meeting Hub provides an estimate only. The Strata Manager will be required to determine whether or not quorum has been met for a meeting. To facilitate recording this information, the 'Quorum Present' checkbox has been added to the 'Commence Meeting' page. 'Quorum Present' will default to unchecked (quorum not present) but should be checked by the Strata Manager if they determine that quorum has been met.

If quorum has not been met the Strata Manager may commence the meeting once they have entered a reason for continuing without quorum.



What's Better

- A minor issue has been resolved when adding votes for a new attendee while the meeting is in progress.
- An error that occurred when adding votes for a meeting that is moved from 'Notice Issued' to 'Meeting Held' has been resolved.
- A minor issue with changing the attendance method of an attendee when they have been marked as having left the meeting, has been resolved.
- An error affecting the generation of the Offline Voting Register for meetings that were created prior to the latest release of Meeting Hub (Release 2.0), has been corrected.
- The quorum indicator tooltip which is available on the Meeting Overview, Attendance Register and Commence Meetings screens, has been enhanced to further describe how the indicator is calculated.
