# What's New

## 1. Meeting Hub – Last Modified date and user

When creating and modifying template groups and Standard entities the 'Last Modified date' and 'User Name' has been added to the screen. This will alert users which templates have been recently edited. The following can be seen under:

1. Standard Motions
2. Standard Agenda Items
3. Standard Meetings
4. Template Groups

Standard Motions example:

## 2. Meeting Hub – Setting Default sorting

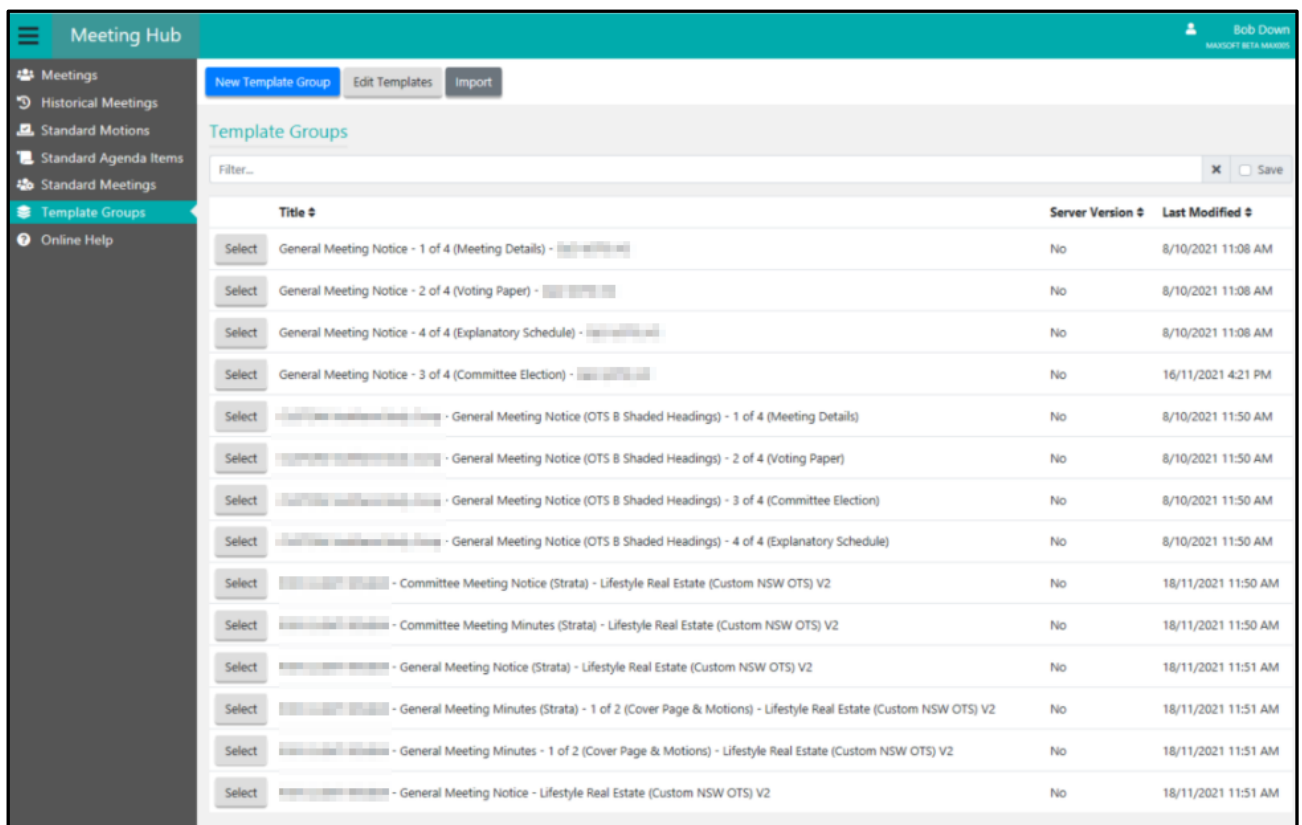

Default lists on the following pages are now sorted by Title:

1. Standard Agenda Items
2. Standard Motions
3. Standard Meetings
4. Template Groups

When a user defines a sorting preference on all lists where sorting is enabled, the sorting applied by the user will be applied when returning to a page.

**Please Note:** Sorting is specific to a user, machine, page and the specific list on a page (i.e. where a page has three lists on the page, such as the meetings home page, each list can have its own sorting applied) This is in the same manner as the 'items per page' setting in the pagination component.

Example below is displaying in order of Group when entered - Most recent shown on the bottom of the list

## What's Better

- A minor issue has been resolved where Motions were being nested under Agenda Items when a meeting is created from a Standard Meeting
- An error was occurring when resolving a custom resolution body, this has now been resolved by ignoring missing fields when determining the resolution body.
- Minor issues have been addressed around formatting Meeting Hub fields. The correct formatting when substituting into Meeting Hub merge fields will now be used.
