

# Release Notes – Version 5.6.46

---

StrataMax has been dedicated to meeting the needs of Strata Managers for over 20 years through the continual enhancement of our software suite. We are committed to providing new functionality to support you in servicing your clients and to provide opportunities for you to optimize efficiency within your office environment.

This document describes exciting new features and enhancements available in the above release.

A history of Release Notes can be reviewed on the [StrataMax Online Help](#)

THE COMPLETE STRATA MANAGEMENT SOLUTION

What's Better .....3

## What's Better

- Status Report format of cheques and eft's has been formatted to match that of the old report. A reference total will only report if there are 2 or more transactions for the creditor.
- Payment Management – The system when reversing payments with expense line tagged as No-GST was applying GST to the reversal. This has now been resolved.
- Report Set/Bank Reconciliation will now report bank statements for Old Year.
- Receipts Report will no longer crash when tagging accounts
- GLMax – Import Buildings as Debtors list will not be ordered by Building name
- Payments Management will no longer show duplicate rows when a payment has more than 19 multi-expenses
- Month End Rollover – Financial Statements will now store using the configured template and not Management Financials
- StrataMax Bing API Printer- enhancements have been made to pass through the meta-data when printing directly from BCMax (not previewing) and send address title instead of letter title for Merge Letters
- Business Activity Statements – The month end should not create 'basbaldat' records for brought forward codes and GST gross codes. This has now been resolved.
