

There are several ways share YouTube or TEDEd videos with your students using the *Rich Content Editor* on a page, announcement, assignment, etc. or with the *External URL* option.

## YouTube or TEDEd Integration Tool

Use this option to put a link or embed a video viewer on a page, discussion, announcement, etc.

1. Access your Canvas course, open the page (or assignment, discussion, etc.), and click **Edit**.
2. Click the **Apps arrow**  and click **View All**.  
NOTE: Your most recent apps are listed, so you may not need to *View All* for subsequent videos.
3. Select **YouTube** or **TEDEd**.
4. Search for the name or subject matter of a video.  
**TIP:** Click the **title** of a video to preview it.
5. Click the **Embed drop-down arrow** and select the default display size of the video.  
**NOTE:** We recommend **Link** or **Small** to make it more mobile-friendly. Students can switch to full screen no matter which size you select.
6. Scroll down and click **Save** or **Save and Publish**.

## YouTube Link Rich Content Editor

Use this option to put a link on a page, discussion, announcement, etc.

1. Go to [YouTube](#), find the applicable video, and copy the URL link.
2. Access your Canvas course, open the page (or assignment, discussion, etc.), and click **Edit**.
3. Enter the title of the video in the text box, highlight it, and click **Link to URL** .
4. Paste the URL link into the applicable field and click **Done**.
5. Scroll down and click **Save** or **Save and Publish**.

## YouTube Link External URL

Use this option if you do not wish to embed it on a page, discussion, announcement, etc.

1. Go to [YouTube](#), find the applicable video, and copy the URL link.
2. Access your Canvas course and scroll to the applicable module.
3. Click the **Plus** sign to the right of the module name.
4. Click the **Add drop-down arrow** and select **External URL**.
5. Paste the URL link into the applicable field.
6. Enter the name of the video in the *Page Name* field and click **Add Item**.  
**HINT:** You do NOT need to use the *Load in new tab* option.
