

Jackrabbit Class Listings Tables Quick Guide

Refer to this quick guide when setting up your Class Listings tables for the following:

- Filter parameters
- Show & Hide columns
- Sort columns

Filtering parameters	&showcols= targets	&hidecols= targets	&sort= targets	
&Loc= x	Location	Class	Class	Cat1
&Session= x	Cat1	Description	Days	Cat2
&Cat1= x	Cat2	Days	StartTime	Cat3
&Cat2= x	Cat3	Times	Ages	Instructors
&Cat3= x	Instructors	Gender	Gender	Duration
&ClassDays= x	Duration	Ages	Openings	Room
&Gender= x	Room	Openings	StartDate	
&Room= x		StartDate	EndDate	
&InstructorID= x		EndDate	Session	
		Session	Tuition	
		Tuition	Location	

x = the name of the parameter in your database, for example, &Cat1=**Ballet**
