Evaluate Cloud System Requirements

Last Modified on 25/01/2023 4:35 pm GMT

Note: This article relates to EValuate Cloud. System requirements for EValuate On-Premise can be found in the following article - **EValuate System Requirements**.

Evaluate Cloud has the application and database stored on Eque2's secure servers. This means that Evaluate can be accessed from any PC, from any location.

A small application is installed locally to provide access to the Cloud software.

System Requirements

Area	Requirement
Operating System	Any Microsoft Supported Version of Windows 10 with the exception of Windows 10S*
Internet Connection	10mbps minimum 20mbps minimum if using the Project Enquiry Centre
Disk Space	50MB for the software installation
CPU	Any modern X64 or X86 processor, single core or above
RAM	Minimum 2GB if running Windows 10 32-bit Minimum 4GB if running Windows 10 64-bit

*If using an Apple Mac a compatible version of Windows should be installed via Apple's Boot Camp (or virtualization software such as Parallels or VM Fusion) and the hardware is compatible with specifications listed above.

Other Software Requirements

- **Microsoft .NET Framework**
 - EValuate 5.5 or above uses Microsoft .NET Framework 4.8.

Note: If you also want to use Dimtronics (DxAPI), you must be using Microsoft .NET Framework 4.8 therefore you must have Evaluate 5.5 or above.

- EValuate 5.4 and below uses Microsoft .NET Framework 4.6.1.

Microsoft .NET Framework downloads are free and can be installed onto any of the supported operating systems.

- **Microsoft Excel (Office 2010 onwards)** - Recommended installed on the clients. Certain reports and views in EValuate are presented in Excel. Without Excel, the user will not be able to view these reports.
 - **Outlook (Office 2010 onwards)** - Recommended installed on the clients. EValuate provides hyperlinks for email addresses, which will start the default email client on the machine running the application.
 - **SMTP Service** - Required if using Project Enquiry Centre module which will send emails from the EValuate to subcontractors. If using Office 365 the SMTP relay must be enabled, see [https://technet.microsoft.com/en-us/library/dn554323\(v=exchg.150\).aspx](https://technet.microsoft.com/en-us/library/dn554323(v=exchg.150).aspx)
 - **Dimtronix (DxAPI)** - There are additional requirements and recommendations for the use of the optional dxAPI 2D Measure / BIM Measure modules. [Find out more >](#)
