Resolved Issues

(IBHRS customers) The **IBHRS Client Export Data tool** no longer times out, but loads after a 15-second wait.

All **Chart/Progress Notes and Group Notes** are displayed as expected when the **Printable** button is clicked in the Search Notes section of finalized Notes.

Clients are now displayed or not displayed as expected in **Checklists** for Residential Agencies.

The **Date of Service** for Residential Checklists will no longer prematurely default to tomorrow's date.
