Open LMS

What's new in Moodle™?

July 22, 2021

Below is some general information about the major updates and new features that have been released in recent versions of core Moodle™. If you would like to share this resource with colleagues who do not have an account in the Open LMS support portal, please use the PDF handout version attached.

Moodle™ 3.10 > 3.11

- Visual changes to completion tracking

    - Completion tracking tick boxes now appear as "mark as done" buttons on the course page.
    - New settings allow teachers to hide or show activity dates and completion conditions on the course page.
    - Please see our separate article about Completion tracking changes in Moodle™ 3.11 for more details and FAQs.

- Learners can control the speed at which Audio and Video files will play.
- An Accessibility toolkit (from Brickfield Education Labs) identifies course accessibility issues.
- Teachers can hide content in the content bank by marking it as unlisted.
- A new column in the content bank displays the number of times an item is linked. Teachers can view overrides and students can view pass grades directly on the Quiz page.

- Custom profile fields may be selected in User policies > Show user identity so they display in participant lists.

Please see the New Features in v3.11 documentation for more information.

Moodle™ 3.9 > 3.10

- Ability to download course content if instructor gives permission to do so.
- Send your badges to your choice of backpack.
- Easily see remaining time with a new scrolling quiz timer.
- Viewed folder resource images and HTML files directly in the browser without having to download them.
- Ability to download and/or replace H5P files in the content bank.
- Set quizzes to be marked complete based on one or more attempts.
- Import and export custom language strings for language customization.

Please see the New Features in v3.10 documentation for more information.

Moodle™ 3.8 > 3.9 (LTS)

- A prominent 'Turn editing on' button
- 'Go to top' of page navigation option
- The *Activity chooser* has been overhauled, now featuring the ability to configure the display and specify recommended types
- H5P integration improvements, including a content bank and better reporting capabilities
- Improved participants page filtering
- Ability to copy entire courses
- Improved Safe Exam Browser integration
- Accessibility enhancements within the Atto text editor
- Clearer navigation in the Book module
- A new completion condition based on the "previous" activity
- Specify access dates when enabling new User Tours

Please see the New Features in v3.9 documentation for more information.
