

# Release Notes – Version 5.6.63

---

StrataMax has been dedicated to meeting the needs of Strata Managers for over 30 years through the continual enhancement of our software suite. We are committed to providing new functionality to support you in servicing your clients and to provide opportunities for you to optimize efficiency within your office environment.

This document describes exciting new features and enhancements available in the above release.

A history of Release Notes can be reviewed on the [StrataMax Online Help](#)

THE COMPLETE STRATA MANAGEMENT SOLUTION

**What's New.....3**

1. Meeting Hub – Update Minutes for Adjourned Meetings.....3

**What's Better.....4**

# What's New

## 1. Meeting Hub – Update Minutes for Adjourned Meetings

When a meeting is adjourned and then reconvened, a manager should be able to send a consolidated version of the minutes which includes details of both the adjourned and the reconvened meeting to owners. If a meeting is adjourned multiple times, the details of all meetings should be included.

Enhancements have been made to document generation that is now capable of receiving a collection of meetings and their associated template groups, instead of just one at a time. The document generation will now join the merged documents for each of the meetings in the collection order that they are received from the website.

## What's Better

- Utility Billing – When there is a Utility building address stored the system was using this address on the outputted bill, this has now been enhanced to only output the Building Address stored in the main building.
- Due date wording when set up for Ledger Card, Levy Notices and Arrears Notices was outputting the due date instead of the due date wording configured. Please note this only applies to deposit templates spayv14 and spayv14x.
- Contact Card – when editing the phone type, the change will now be retained
- Contact Card – contact details can now be changed from upper case to lower case without validation
- Process Bank Statement – When receipting an item from a subgroup which appears in the payments section of the Bank Reconciliation report, Process Bank Statements did not show resulting in incorrect variances. This has now been resolved
- Meeting Hub – Document Generation dates have been enhanced to resolve the issue around Ballot Close date merge field
- Enhancements have been made to owner contact preferences for subgroup accounts where the lot has more than one link to the main lot.
