What's New

This release of the Online Voting system introduces new and enhanced functionality to Meeting Hub and VoteMax.

1. Meeting Hub – Set all attendees financial status to match their Financial in BCMax status

The Attendance Register page has been enhanced to provide a new button, which allows the Financial checkbox to be aligned with the Financial in BCMax value for all attendees.

2. Meeting Hub – Additional functional updates to dates on adjourned meetings

The 'Adjourned Meeting Date and Time' being displayed on the Reconvened Meeting page will be populated with the 'Meeting Close Date and Time' from the Adjourned Meeting page.

Additional validation has been included on the Reconvened Meeting page allowing the 'Reconvened Meeting Date and Time' to be set before the meetings original 'Meeting Open Date and Time', but not before the 'Adjourned Meeting Close Date'. The 'Meeting Open Date and Time' will also be default to the time zone of the local user.

What's Better

- When progressing a meeting, an error will now display against the group of same-issue motions and the same-issue motion when an attachment placeholder exists for the same-issue motion.
- The open date and time field on the Adjourned Meeting page is now being populated with the system date and time.
- The meeting reconvened date is no longer able to be less than the adjourned meeting date on the Reconvened Meeting page.
- The Attendee Vote Collection page has been enhanced to remove the gap between the surname and lot columns.
- Additional validation has been added on the Meeting Overview page when finalising a ballot to confirm the Ballot Only meeting has an open and close meeting date.
- When amending a motion that has already been determined, the vote counts and the voting outcome for the motion will no longer be retained.
