Office Practicum 20.18.3
Release Notes

Release Availability

💻 **On-Premise**: November 21, 2022

☁ **Cloud**: November 19, 2022

📢 **Important Note to Cloud Practices not updated to 20.18.2**
The Practice will be updated to 20.18.3, which will include the below and all updates and resolutions included in 20.18.2. Refer to the [November 2022](#) release article on the Help Center to view these release notes and video.

Before submitting a case highlighting release issues, we recommend reviewing the **Support Trends** to see if your issue has already been reported. If it has, there is no need to create another case.

Updated COVID-19 Vaccine Forecasting

Vaccine Products
➤ *Clinical, Practice Management or Billing tab > Patient Chart > Immunizations*
➤ *Clinical, Practice Management or Billing tab > Patient Chart > Encounter or Well Visit > Immunizations*

The below listed vaccines have been updated to correctly display in the COVID19 section of the Forecast window. Additionally, each of the vaccines status will update based on the recommended dosing schedule.

Vaccine Name	Inventory Name
COVID-19 NOVAVAX	COV2-NVX
COVID-19 MOD BIV	COV2-MOD-BIV
COVID-19 MOD BIV 6-11	COV2-MOD-BIV
COVID-19 PFR BIV	COV2-PFR-BIV-12

Note: These features are dependent upon an external engine update that is expected to release on 11/18/2022. Should this be delayed for any reason, this feature would delay for a few days while the external engine is updated. Notice will go out if the functionality is delayed.

Resource Updates

- COVID-19 Sanofi-GSK EUA Recipient-Caregiver Fact Sheet - Booster.

Issue Resolutions

Vaxelis Manufacturer Code: The Manufacturer Code and Description for Vaxelis has been updated for all vaccine inventories, patient vaccines and state immunization registries from 07/07/21 and moving forward.   • **Code**: MSP / **Description**: MSP Vaccine Company
For Practices using OP eFax Solution: When an incoming document comes into OP using eFax, intermittently users were not able to view the last page when viewing the eFax document. The eFax file itself did contain all pages and was attached to the patient, but due to the way the document management panel view was working, the last page was being hidden from the view. Now with the fix all pages will be viewable.
Texas: For the file based immunization registry interface, where users upload a file with immunization records to registry, OP has made a change to the interface to capture observation date (OBX-14) as per registry's requirement.
Tennessee: For the file based immunization registry interface where users upload a file with immunization records to the registry, OP has made a change to the interface to capture PAN as the Funding Source for COVID vaccines.
