What's New

This release of the Online Voting system introduces new and enhanced functionality to Meeting Hub and VoteMax.

1.   Meeting Hub – Updates to committee election nominations

1.1 Edit Committee Nomination Page

When setting up committee nomination via the Committee Nomination Edit page, a nominee is no longer able to be flagged as elected unopposed to both an executive position and an ordinary position. Nominees are still able to be nominated and elected unopposed for multiple executive positions, however, as soon as they are elected unopposed for an executive position it renders them ineligible to be elected unopposed for an ordinary position as well.

Additional validation has been introduced to ensure multiple nomination entries are unable to be entered for the same individual (lot owner). The Given Name, Surname, Lot Number, and Meeting are checked to see if a record containing those details already exists.

1.2 In Meeting Voting slides

When all of the nominees for an ordinary position have been elected to an executive position, the proceed button will now appear as 'Proceed with No Nominations'.

The text 'No Nominations' will now be displayed on the Motion Result slide and the Close Meeting slide for any ordinary members who have been elected to an executive position.

What's Better

- The Attendee Vote Collection page has been improved to line up the column headers and footers for the vote counts on the attendee rows when there are no warnings for any of the attendees.
- The Attendee Vote Collection page and the Vote Tally have been enhanced to ensure that the outcome of an ordinary position in a committee election is only able to be determined after the executive position outcomes have been decided.
