3 Enhancements to existing features

These are available immediately on Pathways. If you do not have access, please click the 'Request Access' button on the feature within Pathways to arrange a demo or contact one of the team on 0800 783 4477 or hello@synaptic.co.uk.

3.1 Integrations

Synaptic Webline

Send client details to Webline for protection quotes.

Synaptic Product & Fund

Send client details to Product & Fund research portal.

3.2 Switching

Stakeholder Pension

The stakeholder pension is now displayed in the results for Pension and SIPP switches.

Use Holdings in Switching

Use existing holdings as the basis of switch ceding schemes.

3.3 Ex-ante Costs and Charges Statement

Description

The text above the statement has been modified to indicate the basis of the calculations, how growth affects costs and a reminder of the outcome before and after charges are applied.

Product Costs

The label for the product cost over the term has been changed from 'subsequent' to 'Full Term (Annualised) %' as the previous label and value created some ambiguity.

The value reflects the calculated product cost %, which may be lower than the value published by the provider as growth and discounts may be applied.

Aggregated Costs & Charges

The costs in first year label has been changed to 'Effective costs in first year' as there was an expectation that this should match a sum that could be calculated using published figures. This value is calculated monthly and accounts for growth and discounts after charges have been applied.

The label for the reduction in yield values for the first year and the full term has been modified to simply state 'Reduction in Yield'.

4 General Updates

To ensure Pathways continues to meet customer needs, feedback and reported issues are incorporated with each release.

4.1 Changes

Holding Product and Fund Links

Open architecture funds can now be linked to holdings for published platforms and products that support open architecture funds.

Portfolio Factsheet

The factsheet layout has been amended to ensure the content is clearer and includes an update to the Top 10 Holdings.

CIP Segments

Fees on regular contributions are now configurable within a segment.

4.2 Fixes

- GIA with other investment types will return results in all applicable scenarios
- In-House DFM now supported in segments
- Switching critical yield recalculated regardless of scenario
