

EDUCATIONAL WEBINAR

# The Power of Patient Recalls

Wednesday, February 14, 2024

# SPEAKERS

**Alisa Vaughn**

SVP of Revenue  
Expansion Operations,  
Office Practicum

**Kateri Haskett**

CEO,  
Pediatric Associates,  
PSC of Kentucky

**Susan Hannon**

Senior Solutions Engineer,  
Office Practicum

# Here's what we'll talk about today:

- ✔ How to quickly and easily identify children who are due for well visits and immunizations
  - ✔ How to utilize a Demographic Analysis and Recall report to handle two-dose vaccinations and manage chronic care
  - ✔ How to use recall reports to support the expansion and development of your pediatric practice
  - ✔ How to use recall reports to help you identify new revenue streams
- 

# Polling Question

**How do you find kids who are overdue for well visits or vaccines in your pediatric practice?**

- We schedule them before they leave
- We run a recall report in our EHR
- We use a spreadsheet
- We don't have a system in place to do that

# Let's take a look at Well Visit Recalls!

# Polling Question

**How do you decide when it is time to add a new provider or open a satellite office at your practice?**

- We look at how many new patients we've brought into the practice in a year
- We look at how busy our doctors are
- We go on a hunch
- We run a report to look at our entire patient population

**Let's take a  
look at  
Practice  
Growth!**

# Audience Q&A

## Client Success Story

[From Insights to Impact: The Power of Data in Patient Care and Practice Growth](#)

**Client Success Story**

**Problem**  
To provide the highest standard of care, Pediatric Associates, PSC of Kentucky needed to identify and recall patients due for well visits, immunizations, and follow-up care for chronic conditions like asthma and ADHD. They also wanted to use their patient data to support their decision to hire a new provider as they sought to expand their practice.

**Solution**  
OP's Demographic Analysis and Recall (DAR) reporting functionality lets you run reports by age, paper risk, diagnostic code, and provider. When combined with OP's Patient Messaging, the DAR offers a fast and efficient way to recall kids due or overdue for well visits, chronic care, and immunizations, guaranteeing they receive the right care at the right time. The DAR also helps practices plan for future growth and generate more revenue by tracking PUP measures.

**Results**  
Using a variety of DAR reports, the practice has seen an increase in well visit appointments and vaccinated patients, with one use case resulting in a 10% vaccination rate. It also validated their decision to hire a new pediatrician to keep pace with their practice's accelerated growth.

**From Insights to Impact: The Power of Data in Patient Care and Practice Growth**

By utilizing OP's Demographic Analysis and Recall report functionality, Pediatric Associates, PSC of Kentucky is able to see more patients, generate more revenue, and offer better continuity of care to the patients in their pediatric practice.

Pediatricians have long recognized the importance of preventive care based on the American Academy of Pediatrics Periodicity Schedule, ensuring timely vaccinations and screenings for their patients at crucial developmental stages. However, practices often face challenges in recalling patients for these appointments, resulting in missed opportunities for essential care and additional revenue. OP's comprehensive Demographic Analysis and Recall (DAR) report functionality enables pediatric practices to efficiently run recalls in a variety of ways to manage patient care and practice growth with ease.

The following client success story demonstrates the benefits of using the DAR. Discover how these powerful reports aid in identifying children due for well visits, recalling kids due or overdue for vaccines, managing two-dose immunizations and chronic care, and planning for the future growth of your pediatric practice.
