Education institutions must focus on providing optimal **student experiences** to **attract and retain students**. The use of video collaboration in higher education environments is no longer optional. The adoption of hybrid learning techniques was necessary and has accelerated the ongoing need for flexible, **easy to use** solutions that deliver better learning experiences.

**ENHANCED HYBRID LEARNING OPTIONS FOR INSTRUCTORS & STUDENTS**

SIMPLIFIED TECHNOLOGY FOR FACULTY

LECTURE CAPTURE FOR ONGOING ACCESS

At **CBTS**, we make designing, installing, and using AV solutions for the classrooms of the future easy with the help of **RoomReady**. Together we collaborate with your IT Department, Facilities Management and Faculty to deliver experiences that are simple and engaging.

- High quality video and audio ensure **equitable experiences** whether in-person or remote

- Microphones and Cameras **automatically follow the instructor**, capturing a production quality recording without system management.

- Lecture capture technology enables all learners have **ongoing access** to the lessons.

- Solutions designed around **existing video platforms** (Google, Microsoft Teams, Webex, Zoom, etc.) so adoption isn't an issue.

- Intuitive functionality wakes the classrooms and starts the session when the professor walks in so it's **on and ready to use**.

OUR SIX-STEP PROCESS

Through our proven six-step process, we work together to develop a solution that meets your classroom needs from day one. We assemble and test all solutions before they arrive at your classroom, which means minimal downtime for installation, allowing you to get back into the classroom sooner.
