

# Placing Women at the Center of their Care

ISO 27K  
CERTIFIED

Safe in Storage,  
Secure in  
Transit

Tricefy is a specialized **Cloud PACS dedicated to Women's Health**, supporting **Ultrasound, X-ray, Mammography, and DEXA** to seamlessly connect patients and providers across the care network.

With our **easy-to-use platform**, save time and resources by simplifying patient image sharing, clinical coordination, long term storage, reporting, and more. Eliminate administrative tasks like EMR updates, and focus on what matters most, supporting women through all stages of their health journey.

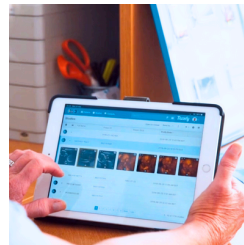

**Backed by 15 years of expertise** in the healthcare industry, we transform the complexities of clinical image management into streamlined care that is loved by both patients and providers. With vendor neutrality, remote installation, and no dedicated onsite hardware, getting started has never been easier.

#12 Product Page WH, April 2024

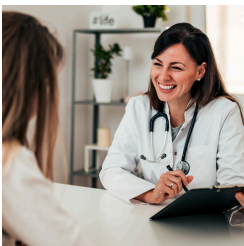

### Seamless Patient Sharing

Instantly share medical images and reports with patients to improve satisfaction, and retention. Add your clinic branding to improve acquisition.

### Access Remotely

Work where you are. Remote access and a feature rich multi-modality viewer support telehealth and access to critical care information at all times, on any device.

### Clinical Collaboration

Easily collaborate with colleagues and multidisciplinary teams across clinical sites to improve productivity and maternal-fetal outcomes.

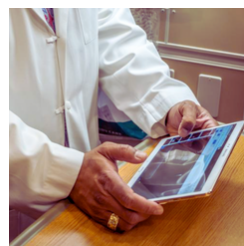

### Long Term Storage

Meet legal requirements for long term examination storage with safe and secure archiving. Easily search, retrieve, and organize your imaging database.

### Personalized Reporting

Improve accuracy and speed by automatically sending measurements and data from the imaging device into a custom report.

### Interoperability

Tricefy offers standardized interfacing for HL7 HIS, RIS, EMR, EHR, and PACS systems. ISO 27K and AES-256 encryption keep data safe - all with a full audit trail.
