

Managely Release Notes

October 2024

Version 5.3.41.30

MANAGELY[®]

Enhancements

Added “PO Number” to Accounts Payable > Bills > Receipts tab grid [116996]

We added the PO Number column to show by default on the Accounts Payable > Bills > Receipts tab grid.

Application Corrections

Missing WorkOrderID On VendorPurchaseOrder and VendorPurchaseOrderDetail [118855]

We verified that the Work Order ID is populated on the Vendor Purchase Order and Vendor Purchase Order Detail as expected.

Receiving error when attempting to open automation table [00120816]

We fixed an error that users were receiving when trying to open the Automation page (Setup > Utilities > Automation).

Error message in host before logging in to this customer [120928]

We fixed an error when attempting to login to a specific customer from the host.

Errors when trying to add authorities in Managely [00120792]

We corrected the errors when trying to add authorities. In addition, when adding the site authority, the record added to the grid was not displaying the data in the County column; we fixed this also.

Error saving work order with Notify User [0012211]

We resolved an error found when saving a work order with an appointment that should notify the technician.
