

# Best in Show: Veterinary Image Management

ISO 27K  
CERTIFIED

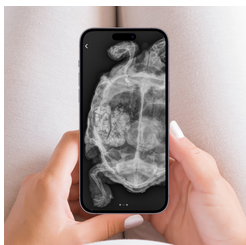

Safe in Storage,  
Secure in  
Transit

Tricefy is a specialized **Cloud PACS dedicated to veterinary care**, supporting **Ultrasound and X-ray**, to seamlessly connect **pet owners and veterinarians across the care network**.

With our **easy-to-use platform**, save time and resources by simplifying veterinary image sharing, clinical coordination, long-term storage, reporting, and more. Eliminate clunky administrative tasks and focus on what matters most, supporting **pets, livestock, and exotics** through all stages of life and health.

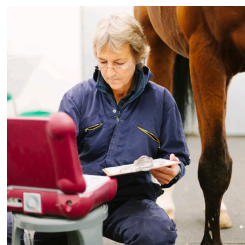

**Backed by 15 years of expertise** in the healthcare industry, we transform the complexities of clinical image management into streamlined care that is loved by both **pet owners and veterinarians**. With connection to any DICOM medical imaging device, remote installation, and no dedicated onsite hardware, getting started has never been easier.

#12 Product Page Veterinary, April 2024

## Seamless Image Sharing

Share veterinary images and reports with pet owners to improve satisfaction and retention. Add practice branding to grow acquisitions and referrals.

## Access Remotely

Remote access and a feature rich multi-modality viewer supports telehealth, equine pre-purchase exams, and access to care information at any time, on any device.

## Clinical Collaboration

Easily collaborate with specialists, multidisciplinary teams, and research facilities to improve productivity and animal health outcomes.

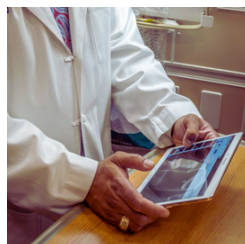

## Long Term Storage

Ensure continuity of care, prevent redundant imaging, and meet legal storage requirements with a secure, accessible, and user-friendly archiving system.

## Personalized Reporting

Automatically send measurements and data from an imaging device into a custom report. Reports can be created for any breed or imaging examination.

## Interoperability

Tricefy offers interfacing for PMS, LIS, and PACS systems. ISO 27K and AES-256 encryption keep data safe - all with a full audit trail.
