

Welcome to the Aveanna Family!

We are excited you joined our Home Health team here at Aveanna. We know it is a big decision to join a new organization. We want to make sure you are well equipped to be successful upon starting your journey with us.

With that as our backdrop, it is important you have all the information you need to confidently perform your job. Please feel free to ask any questions during this orientation period. The leadership team has developed a thorough orientation program that will provide you the foundational information necessary to be successful as a clinician at Aveanna.

To get the most out of this time, the orientation training log in this folder will be your roadmap, and you will be responsible for completing all items timely. It is important to thoroughly complete all items even if you are an experienced clinician in home health as there are always nuances at organizations that may be different. You may also learn new information. This training log will need to be turned in to office leadership at the end of your orientation, please keep track of it.

Knowledge Base is our education platform that you will be introduced to as you complete your orientation. Knowledge Base is your source for educational materials in addition to content and resources such as educational handouts that you can print for patients. Don't forget to take advantage of this resource after orientation. You can access this on the tablet you have received so it is always available to you.

Home Care Home Base is our EMR platform for all clinical documentation. You will have a preceptor/mentor/clinical leadership, along with access to Knowledge Base processes to help guide you through using the system.

The branch you are assigned to will be your local contact during this orientation period and throughout your employment. Please contact them with any questions.

Thank you again for choosing Aveanna, our patients and your team members are excited to meet you!

Sincerely,

Toni McShary, **RN**

Vice President Clinical Services

To revolutionize the way home care is delivered, one patient at a time.

Our Core Values

Compassion

Team Integrity

Inclusion

Trust

Innovation

Hepatitis-B Immunization Release: **Acceptance**

I understand the potential benefits and side effects/adverse reactions of the HBV vaccine. I consent to receive the Hepatitis-B vaccine. I release the company from all liability in connection with the administration of the vaccine. I understand the vaccine is given in three (3) doses. Initial, in one month, and in six months. I understand that it is my responsibility to make arrangements for each of the three doses.

Date Initial Vaccine Received: _____ L R Deltoid

Administered By: _____

Employee's Signature: _____

Date Second Dose Received: _____ L R Deltoid

Administered By: _____

Employee's Signature: _____

Date Third Dose Received: _____ L R Deltoid

Administered By: _____

Employee's Signature: _____

****Failure to follow through with obtaining the vaccine will be considered a change of mind and therefore a declination of the vaccine.**

Hepatitis-B Immunization Release: **Declination**

I understand that due to my occupational exposure to blood or other potentially infectious materials I may be at risk of acquiring Hepatitis-B (HBV) infection. I have been given the opportunity to be vaccinated with Hepatitis-B vaccine at this time at no charge to myself. However, I choose to decline the Hepatitis-B vaccination at this time. I understand that by declining this vaccination, I continue to be a risk of acquiring Hepatitis-B, a serious disease. If in the future I continue to have occupational exposure to blood or other potentially infectious materials I want to be vaccinated with the Hepatitis-B vaccine, I can receive the vaccination at no charge to me.

- I do not have documentation of Hepatitis-B immunity and choose not to receive the vaccine. I release the company from all liability for any hazards that may result from possible exposure to the disease.

- I have received the vaccine from another agency/organization and choose not to receive the vaccine

Name: _____ Date: _____

Persons should be considered at increased risk for TB if they answer "yes" to any question(s)

1. What position will you hold? _____
2. Have you had temporary or permanent residence of >1 month in a country with a high TB rate? This includes all countries except those in Western Europe, Northern Europe, Canada, Australia, and New Zealand.
 Yes No
3. Have you had close contact with anyone who has had infectious TB disease since the last TB Test?
 Yes No
4. Do you currently have any of the following symptoms?
 - a. Yes No unexplained fever for more than 3 weeks
 - b. Yes No cough for more than 3 weeks with sputum production
 - c. Yes No bloody sputum
 - d. Yes No unintended weight loss >10 pounds
 - e. Yes No drenching night sweats
 - f. Yes No unexplained fatigue for more than 3 weeks
5. Have you ever been diagnosed with active TB disease?
 Yes No
6. Have you ever been diagnosed with latent TB infection or had a positive skin test or a positive blood test for TB?
 Yes No
7. Have you been treated with medication for TB or for a positive TB test (eg, taken "INH")?
 Yes No

If yes, what year, with which medication, for how long, and did you complete the treatment course?

8. Do you have any current or planned immunosuppression?
Including HIV infection organ transplant recipient, treatment with a TNF-alpha antagonist (eg., infliximab, etanercept, or other) chronic steroids (equivalent of prednisone > 15 mg/day for > 1 month) or other immunosuppressive medication?
 Yes No

Job Title: _____ Age: _____ Sex: _____

PART A SECTION 1 (MANDATORY) - The following information must be provided by every employee who has been selected to use any type of respirator (please print).
Your height: _____ ft. _____ in. Your weight: _____
Check the type of respirator you will use (you can check more than one category): a. <input type="checkbox"/> N (N series masks such as N95, N100) b. <input type="checkbox"/> Other type (for example, half – or full-facepiece type, powered – air purifying, supplied air, self-contained breathing apparatus).
Have you worn a respirator (check one): <input type="checkbox"/> Yes <input type="checkbox"/> No _____ If “Yes”, what type(s): _____

PART A SECTION 2 (MANDATORY) - Questions 1 through 9 below must be answered by every employee who has been selected to use any type of respirator. (Check “Yes” or “No”)	
1. Do you currently smoke tobacco, or have you smoked tobacco in the last month?	<input type="checkbox"/> Yes <input type="checkbox"/> No
2. Have you ever had any of the following conditions?	
Seizures (fits)	<input type="checkbox"/> Yes <input type="checkbox"/> No
Diabetes (sugar disease)	<input type="checkbox"/> Yes <input type="checkbox"/> No
Allergic reactions that interfere with your breathing	<input type="checkbox"/> Yes <input type="checkbox"/> No
Claustrophobia (fear of closed-in places)	<input type="checkbox"/> Yes <input type="checkbox"/> No
Trouble smelling odors	<input type="checkbox"/> Yes <input type="checkbox"/> No
3. Have you ever had any of the following pulmonary or lung problems?	
Asbestosis	<input type="checkbox"/> Yes <input type="checkbox"/> No
Asthma	<input type="checkbox"/> Yes <input type="checkbox"/> No
Chronic bronchitis	<input type="checkbox"/> Yes <input type="checkbox"/> No
Emphysema	<input type="checkbox"/> Yes <input type="checkbox"/> No
Pneumonia	<input type="checkbox"/> Yes <input type="checkbox"/> No
Tuberculosis	<input type="checkbox"/> Yes <input type="checkbox"/> No
Silicosis	<input type="checkbox"/> Yes <input type="checkbox"/> No
Pneumothorax (collapsed lung)	<input type="checkbox"/> Yes <input type="checkbox"/> No
Lung cancer	<input type="checkbox"/> Yes <input type="checkbox"/> No
Broken ribs	<input type="checkbox"/> Yes <input type="checkbox"/> No
Any chest injuries or surgeries	<input type="checkbox"/> Yes <input type="checkbox"/> No
Any other lung problem that you’ve been told about	<input type="checkbox"/> Yes <input type="checkbox"/> No
4. Do you currently have any of the following symptoms of pulmonary or lung disease?	
Shortness of breath	<input type="checkbox"/> Yes <input type="checkbox"/> No
Shortness of breath when walking on level ground or walking up a slight hill or incline	<input type="checkbox"/> Yes <input type="checkbox"/> No
Shortness of breath when walking with other people at an ordinary pace on level ground	<input type="checkbox"/> Yes <input type="checkbox"/> No
Have to stop for breath when walking	<input type="checkbox"/> Yes <input type="checkbox"/> No
Shortness of breath when washing or dressing yourself	<input type="checkbox"/> Yes <input type="checkbox"/> No
Shortness of breath that interferes with your job	<input type="checkbox"/> Yes <input type="checkbox"/> No
Coughing that produces phlegm (thick sputum)	<input type="checkbox"/> Yes <input type="checkbox"/> No
Coughing that wakes you early in the morning	<input type="checkbox"/> Yes <input type="checkbox"/> No
Coughing that mostly occurs when you are lying down	<input type="checkbox"/> Yes <input type="checkbox"/> No
Coughing up blood in the last month	<input type="checkbox"/> Yes <input type="checkbox"/> No

Wheezing	<input type="checkbox"/> Yes <input type="checkbox"/> No
Wheezing that interferes with your job	<input type="checkbox"/> Yes <input type="checkbox"/> No
Chest pain when you breathe deeply	<input type="checkbox"/> Yes <input type="checkbox"/> No
Any other symptoms that you think may be related to lung problems	<input type="checkbox"/> Yes <input type="checkbox"/> No
5. Have you ever had any of the following cardiovascular or heart problems?	
Heart attack	<input type="checkbox"/> Yes <input type="checkbox"/> No
Stroke	<input type="checkbox"/> Yes <input type="checkbox"/> No
Angina	<input type="checkbox"/> Yes <input type="checkbox"/> No
Heart failure	<input type="checkbox"/> Yes <input type="checkbox"/> No
Swelling in your legs or feet (not caused by walking)	<input type="checkbox"/> Yes <input type="checkbox"/> No
Heart arrhythmia	<input type="checkbox"/> Yes <input type="checkbox"/> No
High blood pressure	<input type="checkbox"/> Yes <input type="checkbox"/> No
Any other heart problems that you've been told about	<input type="checkbox"/> Yes <input type="checkbox"/> No
6. Have you ever had any of the following cardiovascular or heart symptoms?	
Frequent pain or tightness in your chest	<input type="checkbox"/> Yes <input type="checkbox"/> No
Pain or tightness in your chest during physical activity	<input type="checkbox"/> Yes <input type="checkbox"/> No
Pain or tightness in your chest that interferes with your job	<input type="checkbox"/> Yes <input type="checkbox"/> No
In the past two years, have you noticed your heart skipping or missing a beat?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Heartburn or indigestion that is not related to eating	<input type="checkbox"/> Yes <input type="checkbox"/> No
Any other symptoms that you think might be related to heart or circulation problems	<input type="checkbox"/> Yes <input type="checkbox"/> No
7. Do you currently take any medications for any of the following problems?	
Breathing or lung problems	<input type="checkbox"/> Yes <input type="checkbox"/> No
Heart trouble	<input type="checkbox"/> Yes <input type="checkbox"/> No
Blood pressure	<input type="checkbox"/> Yes <input type="checkbox"/> No
Seizures (fits)	<input type="checkbox"/> Yes <input type="checkbox"/> No
8. If you've ever used a respirator, have you ever had any of the following problems? (If you've never used a respirator, check the following box <input type="checkbox"/> and go to question 9.)	
Eye irritation	<input type="checkbox"/> Yes <input type="checkbox"/> No
Skin allergies or rash	<input type="checkbox"/> Yes <input type="checkbox"/> No
Anxiety	<input type="checkbox"/> Yes <input type="checkbox"/> No
General weakness or fatigue	<input type="checkbox"/> Yes <input type="checkbox"/> No
Any other problem that interferes with your use of a respirator	<input type="checkbox"/> Yes <input type="checkbox"/> No
9. Would you like to talk to a health care professional who will review this questionnaire about your answers to these questions?	<input type="checkbox"/> Yes <input type="checkbox"/> No
This Section Generally Not Applicable: Questions 10 to 15 below must be answered by every employee who has been selected to use either a full-facepiece respirator or self-contained breathing apparatus (SCBA). For employees who have been selected to use other types of respirators, answering these questions is voluntary.	
10. Have you ever lost vision in either eye (temporarily or permanently)	<input type="checkbox"/> Yes <input type="checkbox"/> No
11. Do you currently have any of the following vision problems?	
Wear contact lenses	<input type="checkbox"/> Yes <input type="checkbox"/> No
Wear glasses	<input type="checkbox"/> Yes <input type="checkbox"/> No
Color blindness	<input type="checkbox"/> Yes <input type="checkbox"/> No
Any other eye or vision problem	<input type="checkbox"/> Yes <input type="checkbox"/> No
12. Have you ever had an injury to your ears, including a broken ear drum?	<input type="checkbox"/> Yes <input type="checkbox"/> No

13. Do you currently have any of the following hearing problems?	
Difficulty hearing	<input type="checkbox"/> Yes <input type="checkbox"/> No
Wear a hearing aide	<input type="checkbox"/> Yes <input type="checkbox"/> No
Any other hearing or ear problems	<input type="checkbox"/> Yes <input type="checkbox"/> No
14. Have you ever had a back injury?	
	<input type="checkbox"/> Yes <input type="checkbox"/> No
15. Do you currently have any of the following musculoskeletal problems?	
Weakness in any of your arms, hands, legs, or feet	
Back pain	<input type="checkbox"/> Yes <input type="checkbox"/> No
Difficulty fully moving your arms or legs	<input type="checkbox"/> Yes <input type="checkbox"/> No
Pain or stiffness when you lean forward or backward at the waist	<input type="checkbox"/> Yes <input type="checkbox"/> No
Difficulty fully moving your head up and down	<input type="checkbox"/> Yes <input type="checkbox"/> No
Difficulty fully moving your head side to side	<input type="checkbox"/> Yes <input type="checkbox"/> No
Difficulty bending at your knees	<input type="checkbox"/> Yes <input type="checkbox"/> No
Difficulty squatting to the ground	<input type="checkbox"/> Yes <input type="checkbox"/> No
Climbing a flight of stairs or a ladder carrying more than 25 pounds	<input type="checkbox"/> Yes <input type="checkbox"/> No
Any other muscle or skeletal problem that interferes with using a respirator	<input type="checkbox"/> Yes <input type="checkbox"/> No

Information for Employees Using Respirators when Not Required Under the Standard

Respirators are an effective method of protection against designated hazards when properly selected and worn. Respirator use is encouraged, even when exposures are below the exposure limit, to provide additional level of comfort and protection for workers. However, if a respirator is used improperly or not kept clean, the respirator itself can become hazard to the worker. Sometimes, workers may wear respirators to avoid exposures to hazards, even if the amount of hazardous substance does not exceed the limits set by OSHA standards. If your employer provides respirators for your voluntary use, or if you provide your own respirator, you need to take certain precautions to be sure that the respirator itself does not represent a hazard.

You should do the following:

1. Read and heed all instructions provided by the manufacturer on use, maintenance, cleaning and care, and warnings regarding the respirator limitations.
2. Choose respirators certified for use to protect against the contaminant of concern. NIOSH, the National Institute for Occupational Safety and Health of the U.S. Department of Health and Human Services, certifies respirators. A label or statement of certification should appear on the respirator packaging. It will tell you what the respirator is designated for and how much it will protect you.
3. Do not wear your respirator into atmospheres containing contaminants for which your respirator is not designated to protect against. For example, a respirator designated to filter dust particles will not protect you against gases, fumes, vapors, or very small solid particles of fumes or smoke.
4. Keep track of your respirator so that you do not mistakenly use someone else's respirator.

Employee Fit Test/Personal Protective Equipment (PPE)

3M™ FT-10 (sweet) and 3M™ FT-30 (bitter) fit test kits are suitable for disposable respirators, half facepiece fitted with particulate filters, and full facepieces fitted with particulate filters.¹

! Wearers must be clean-shaven to get a proper fit with a respirator.

! Please note, in order to carry out a full fit test, all the steps detailed below must be followed (Parts 1 & 2).

Part 1 - Sensitivity Testing (The “Taste Test”)

1. Add 1/2 teaspoon of sensitivity solution (in red labeled bottle) into the sensitivity nebulizer (marked in red). Visually confirm that the nebulizer produces a cloud of aerosol when the bulb is squeezed.
2. Place test hood on participant. A respirator should not be worn during the sensitivity test.
3. Ask the participant to breathe through their mouth with their tongue slightly extended and ask them to indicate immediately when they taste the solution.
4. Squeezing the bulb completely and aiming the nebulizer to the side rather than directly at the subject, squeeze solution into the hood and count the number of squeezes it takes for the solution to be tasted.
5. If desired, participant may drink some water.

Part 2 - Fit Testing

1. Add 1/2 teaspoon of test solution (in black labeled bottle) into the test nebulizer (marked in black). Visually confirm that the nebulizer produces a cloud of aerosol when the bulb is squeezed.
2. Don the respirator and make sure respirator is fitted correctly. Refer to the 3M fitting instructions or poster for correct procedure. After the respirator is correctly donned, wait five minutes before beginning the next step.
3. Place test hood on participant.

4. Introduce solution in an initial dose and start the exercises. Add a replenishing dose after every 30 second per the table below.
5. After the initial dose, ask the participant to carry out the 7 exercises shown in turn for 1 minute each and indicate immediately if solution is tasted. Remember to add a replenishing dose every 30 seconds. **Throughout the test, remind the participant to breathe through their mouth and visually confirm that the nebulizer is not clogged.**
6. Record all results. If solution is not tasted after all 7 exercises. they have passed the test with that specific respirator. **If solution is tasted, stop the test, rinse mouth, face, and hands, refit respirator and restart at Part 1 - Sensitivity Testing.** If solution is still tasted on the second attempt, stop the test, rinse hands, mouth, and face, and consider trying an alternative 3M respirator.
7. Discard all unused solution.

Number of Squeezes Needed in Part 1	Number of Squeezes for Initial Dose	Number of Squeezes for a Replenishing Dose Every 30 Seconds
1-10	10	5
11-20	20	10
21-30	30	15

! Stop the test if solution is not tasted after 30 squeezes. Try an alternative solution from below.

Sweet taste 3M-FT11 (sensitivity solution)
3M-FT12 (test solution)

Bitter taste 3M-FT31 (sensitivity solution)
3M-FT32 (test solution)

7 Exercises

This product is part of a system that helps reduce exposures to certain airborne contaminants. Before use, the wearer must read and understand these User Instructions. Follow all local regulations. In the U.S., a written respiratory protection program must be implemented meeting all the requirements of 29 CFR 1910.134, including training, fit testing and medical evaluation. In Canada, CSA standard Z94.4 requirements must be met and/or requirements of the applicable jurisdiction, as appropriate. Misuse may result in injury, sickness or death. For correct use, consult supervisor and User Instructions, or call 3M Technical Service in USA at 1-800-243-4630 and in Canada at 1-800-267-4414.

¹Quantitative fit testing must be used when an assigned protection factor higher than 10 is needed for a full facepiece used in negative pressure mode, per 29 CFR 1910.134

Seven Steps to Correctly Wear a Respirator at Work

Following these simple steps will help you properly put on and take off your respirator, and keep you and everyone else safe.

1 Wash Your Hands

Wash your hands with soap and water or alcohol-based hand rubs containing at least 60% alcohol.

2 Inspect the Respirator

Inspect the respirator for damage. If it appears damaged or damp, do not use it.

3 Put on the Respirator

Cup the respirator in your hand with the nosepiece at your fingertips and the straps hanging below your hand.

Cover your mouth and nose with the respirator and make sure there are no gaps (e.g., facial hair, hair, and glasses) between your face and the respirator.

Place the strap over your head and rest at the top back of your head. If you have a second strap, place the bottom strap around your neck and below your ears. Do not crisscross straps.

If your respirator has a metal nose clip, use your fingertips from both hands to mold the nose area to the shape of your nose.

4 Adjust the Respirator

Place both hands over the respirator. Inhale quickly and then exhale. If you feel leakage from the nose, readjust the nosepiece; if leakage from the respirator edges, readjust the straps.

Repeat until you get a proper seal. If you can't get a proper seal, try another respirator.

5 Wear the Respirator

Avoid touching the respirator while using it. **If you do, wash your hands.**

Note: If you reuse your respirator, wear gloves when inspecting and putting on the respirator. Avoid touching your face (including your eyes, nose, and mouth) during the process.

6 Remove the Respirator

Wash your hands.

Remove the respirator from behind. Do not touch the front.

7 Dispose of the Respirator

If the respirator does not need to be reused because of supply shortages, discard it in a closed-bin waste receptacle. Wash your hands.

For more information, see the quick video, "Putting On and Taking Off a Mask". ▶

Respiratory Protection Program Employee Education

Aveanna Healthcare's Respiratory Protection Program applies to all home health and Aveanna employees who may at times require respiratory protection for infection control purposes. This program is intended to provide each employee with a respirator where applicable to protect the health of such employee.

A respirator may be used to provide protection from infectious diseases such as measles, varicella, smallpox, tuberculosis, SARS, pandemic influenza or COVID. It is important to ensure a proper fit. An improper fit, improper use, failure to store properly or failure to inspect prior to each use can compromise protective equipment. For questions related to respirator use, contact your supervisor.

Limitations of a respirator:

- Respirators are intended for biologic agents.
- Respirators limit but do not provide a 100% guarantee to eliminate risk.
- Respirators do not protect against gasses, vapors, oil, aerosol, asbestos, arsenic, cadmium, lead or sandblasting.
- Respirators do not provide oxygen.
- Respirators should not be used with beards or facial hair that can obstruct a good seal.

Respirator malfunction:

- If the respirator becomes damaged or soiled, a leak is detected, or breathing becomes difficult, leave the contaminated area immediately and replace the respirator.

Donning and Removing the Respirator:

- Review the 'Helping You Wear It Right' manufacturer instruction sheet for proper donning, user seal check, and removal of the respirator.
- You must perform a user seal check to ensure that an adequate seal is achieved each time the respirator is put on using the respirator manufacturer's recommended user seal check method.

Storage, Cleaning and Reuse of the Respirator:

- Store in a clean, dry area with no exposure to direct sunlight or temperature extremes.
- The respirator can be stored in a paper bag.
- Do not crush the respirator.
- Respirators cannot be cleaned or disinfected.
- There are no manufacturer recommendations on time use limit.
- If the medical condition requires only airborne precautions (e.g., TB):
 - Discard the respirator if it is soiled, if breathing becomes labored, or if structural integrity is compromised.
- If the condition also requires contact and/or droplet precautions:
 - The respirator must be discarded after a single use. However, in times of shortage, users may be instructed to cover the respirator with a surgical mask and discard the mask after use but reuse the respirator. This decision will be made by the Respiratory Protection Program Administrator based on supply and available epidemiological data. Decisions will be clearly communicated to the staff.

SEQUENCE FOR **PUTTING ON** PERSONAL PROTECTIVE EQUIPMENT (PPE)

The type of PPE used will vary based on the level of precautions required, such as standard and contact, droplet or airborne infection isolation precautions. The procedure for putting on and removing PPE should be tailored to the specific type of PPE.

1. GOWN

- Fully cover torso from neck to knees, arms to end of wrists, and wrap around the back
- Fasten in back of neck and waist

2. MASK OR RESPIRATOR

- Secure ties or elastic bands at middle of head and neck
- Fit flexible band to nose bridge
- Fit snug to face and below chin
- Fit-check respirator

3. GOGGLES OR FACE SHIELD

- Place over face and eyes and adjust to fit

4. GLOVES

- Extend to cover wrist of isolation gown

USE SAFE WORK PRACTICES TO PROTECT YOURSELF AND LIMIT THE SPREAD OF CONTAMINATION

- Keep hands away from face
- Limit surfaces touched
- Change gloves when torn or heavily contaminated
- Perform hand hygiene

HOW TO SAFELY REMOVE PERSONAL PROTECTIVE EQUIPMENT (PPE)

EXAMPLE 1

There are a variety of ways to safely remove PPE without contaminating your clothing, skin, or mucous membranes with potentially infectious materials. Here is one example. **Remove all PPE before exiting the patient room** except a respirator, if worn. Remove the respirator **after** leaving the patient room and closing the door. Remove PPE in the following sequence:

1. GLOVES

- Outside of gloves are contaminated!
- If your hands get contaminated during glove removal, immediately wash your hands or use an alcohol-based hand sanitizer
- Using a gloved hand, grasp the palm area of the other gloved hand and peel off first glove
- Hold removed glove in gloved hand
- Slide fingers of ungloved hand under remaining glove at wrist and peel off second glove over first glove
- Discard gloves in a waste container

2. GOGGLES OR FACE SHIELD

- Outside of goggles or face shield are contaminated!
- If your hands get contaminated during goggle or face shield removal, immediately wash your hands or use an alcohol-based hand sanitizer
- Remove goggles or face shield from the back by lifting head band or ear pieces
- If the item is reusable, place in designated receptacle for reprocessing. Otherwise, discard in a waste container

3. GOWN

- Gown front and sleeves are contaminated!
- If your hands get contaminated during gown removal, immediately wash your hands or use an alcohol-based hand sanitizer
- Unfasten gown ties, taking care that sleeves don't contact your body when reaching for ties
- Pull gown away from neck and shoulders, touching inside of gown only
- Turn gown inside out
- Fold or roll into a bundle and discard in a waste container

4. MASK OR RESPIRATOR

- Front of mask/respirator is contaminated — **DO NOT TOUCH!**
- If your hands get contaminated during mask/respirator removal, immediately wash your hands or use an alcohol-based hand sanitizer
- Grasp bottom ties or elastics of the mask/respirator, then the ones at the top, and remove without touching the front
- Discard in a waste container

5. WASH HANDS OR USE AN ALCOHOL-BASED HAND SANITIZER IMMEDIATELY AFTER REMOVING ALL PPE

PERFORM HAND HYGIENE BETWEEN STEPS IF HANDS BECOME CONTAMINATED AND IMMEDIATELY AFTER REMOVING ALL PPE

HOW TO SAFELY REMOVE PERSONAL PROTECTIVE EQUIPMENT (PPE) EXAMPLE 2

Here is another way to safely remove PPE without contaminating your clothing, skin, or mucous membranes with potentially infectious materials. **Remove all PPE before exiting the patient room** except a respirator, if worn. Remove the respirator **after** leaving the patient room and closing the door. Remove PPE in the following sequence:

1. GOWN AND GLOVES

- Gown front and sleeves and the outside of gloves are contaminated!
- If your hands get contaminated during gown or glove removal, immediately wash your hands or use an alcohol-based hand sanitizer
- Grasp the gown in the front and pull away from your body so that the ties break, touching outside of gown only with gloved hands
- While removing the gown, fold or roll the gown inside-out into a bundle
- As you are removing the gown, peel off your gloves at the same time, only touching the inside of the gloves and gown with your bare hands. Place the gown and gloves into a waste container

2. GOGGLES OR FACE SHIELD

- Outside of goggles or face shield are contaminated!
- If your hands get contaminated during goggle or face shield removal, immediately wash your hands or use an alcohol-based hand sanitizer
- Remove goggles or face shield from the back by lifting head band and without touching the front of the goggles or face shield
- If the item is reusable, place in designated receptacle for reprocessing. Otherwise, discard in a waste container

3. MASK OR RESPIRATOR

- Front of mask/respirator is contaminated — DO NOT TOUCH!
- If your hands get contaminated during mask/respirator removal, immediately wash your hands or use an alcohol-based hand sanitizer
- Grasp bottom ties or elastics of the mask/respirator, then the ones at the top, and remove without touching the front
- Discard in a waste container

4. WASH HANDS OR USE AN ALCOHOL-BASED HAND SANITIZER IMMEDIATELY AFTER REMOVING ALL PPE

PERFORM HAND HYGIENE BETWEEN STEPS IF HANDS BECOME CONTAMINATED AND IMMEDIATELY AFTER REMOVING ALL PPE

When using an EMR where only capital letters are used, the capitalized version of these abbreviations are also approved.

& = and

2ww = two wheeled walker

4ww = four wheeled walker

A

a.m. = before noon (*latin: ante meridiem*)

ā = before (*latin: ante*)

AAROM = active assisted range of motion

ABX = antibiotics

ABD = abdomen

ac = before meals (*latin: ante cibum*)

AD = assistive devices

ad lib = at liberty, freely

ADL = activities of daily living

AFO = ankle foot orthosis

AFib = atrial fibrillation

AKA = above knee amputation

ALF = assisted living facility

AMP = amputation

Appt = appointment

AROM = active range of motion

ASAP = as soon as possible

Auth = authorization

ax. = axillary, axis

B

b.i.d. = twice a day (*latin: bis in die*)

B or B/L = bilateral

BBS = bilateral breath sounds

BG = blood glucose

BIPAP = bilevel positive airway pressure

BKA = below knee amputation

BLE = bilateral lower extremities

BLS = basic life support

BM = bowel movement

BOS = base of support

BP = blood pressure

BS = breath sounds or bowel sounds

BSC = bedside commode

BST = bedside table

BUE = bilateral upper extremities

C

c̄ = with (*latin: cum*)

C/B or CB = characterized by

C/D/I = clean, dry & intact

c/o = complains of

C = centigrade

CABG = coronary artery bypass graft

cal = calorie

cath = catheter

CG = contact guard

CGA = contact guard assistance

cg = caregiver

CHF = congestive heart failure

CLOF = current level of function

cm = centimeter

CN = cranial nerve

CNA = certified nursing assistant

CNS = central nervous system

CO₂ = carbon dioxide

Cont. = continued

COPD = chronic obstructive pulmonary disease

CoPs = conditions of participation

COTA = Certified Occupational Assistant

CP = cerebral palsy

CPAP = constant positive airway pressure

CPR = cardiopulmonary resuscitation

CPT = chest percussion therapy

CTA = clear to auscultation

CTI = certification of terminal illness

CVAD = central venous access device

CVC = central venous catheter

CVL = central venous line

CXR = chest x-ray

D

d/t = due to

D/C or DC = discharge; discontinue

DD = discipline discharge

Demo = demonstrate/demonstration

DM = diabetes mellitus

DME = durable medical equipment

DNR = do not resuscitate

DOB = date of birth

DOE = dyspnea on exertion

DOS = date of service

DSD = dry sterile dressing

DTR = daughter

Dx = diagnosis

E

ECOC = estimated cost of care

ED = Emergency Department

EENT = eye, ear, nose & throat

EMT = Emergency Medical Technician

ENT = ear, nose & throat

EOB = end of bed

EOL = end of life

EPAP = expiratory positive airway pressure

ER = Emergency Room, external rotation

ETCO₂ or ETCO₂ = end tidal carbon dioxide

ETT = endotracheal tube

Exam = examination

EXT = external

F

F = fahrenheit

F/U = follow up

F2F = face to face

FFOC = foster father of child

FM = fine motor

FMOC = foster mother of child

FOC = focus of care, father of child

Fr = French

FSBS = finger stick blood sugar

FWB = full weight bearing

FWW = front wheeled walker

FX = fracture

G

GCS = Glasgow Coma Scale

GERD = gastro esophageal reflux disease

GFOC = grandfather of child

GI = gastrointestinal

GJ = gastrostomy-jejunostomy tube

gm. = gram

GM = gross motor

GMOC = grandmother of child

Gt. Tr. or GT. TR. = gait training

GT or Gtube = gastrostomy tube

gtt = drops (*latin: guttae*)

GU = genitourinary

H

H/A = headache

h.s. = bedtime (*latin: hora somni*)

H/O = history of

H₂O or H₂O = water

HCS = healthcare surrogate

HEP = home exercise program

HH = Home Health

HHH = Home Health Hospice

HHA = Home Health Aide

hha = hand hold assist

HLD = hyperlipidemia

HME = heat moisture exchanger

HOB = head of bed

HoH = hard of hearing

HOH = hand over hand

HOHA = hand over hand assistance

hr. = hour

HR = heart rate

HRRR = heart rate and rhythm regular

HTN = hypertension

HUH = hand under hand

HX = history

hz = hertz

I

I = independent

I/O or I&O = intake/output

IADLs = instrumental activities of daily living

IBS = irritable bowel syndrome

ICP = intracranial pressure

ICU = Intensive Care Unit

IE = initial evaluation

IHSS = In Home Support Services

ILF = Independent Living Facility

IM = intramuscular

IMV = intermittent mandatory ventilation

IND = independently

IPAP = inspiratory positive airway pressure

IPPB = intermittent positive pressure breathing

IR = internal rotation

Irreg. or IRREG. = irregular

IV = intravenous; intraventricular

J

JTube = jejunostomy tube

K

KAFO = knee ankle foot orthosis

kg = kilogram

L

L = left

lb = pound

LBQC = long based quad cane

LCTA = lungs clear to auscultation

LE = lower extremity

LHA = Licensed Health Aide

LLE = left lower extremity

LMN = letter of medical necessity

LOB = loss of balance

LOC = level of consciousness

LOS = length of stay

LPM = liters per minute

LPN = Licensed Practical Nurse

LVN = Licensed Vocational Nurse

LUE = left upper extremity

M

MAEW = moves all extremities well

Maint = maintain

MAR = medication administration record

Max. or Mas = maximum or maximal, maxillary

MaxA = maximal assistance

MBSS = modified barium swallow study

mcg = micrograms

MD = Medical Doctor

MDI = metered dose inhaler

med = medication

Med Dir = Medical Director

mEq = milliequivalent

Min = minimal

mg = milligram

MinA = minimal assistance

mL = milliliter

mm = millimeter

MMT = manual muscle test

MOC = mother of child

Mod = moderate

ModA = moderate assistance

ModI = modified independent

MR# = medical record number

MRI = magnetic resonance imaging

MSW = Medical Social Worker

MVA = motor vehicle accident

N

n/a = not applicable

NAD = no abnormality detected, no apparent distress

NB = non-billable

NC = nasal cannula

ND = not done

Neg = negative

NG = nasogastric

NICU = Neonatal Intensive Care Unit

NJ = nasojejunal

NKA = no known allergies

NKDA = no known drug allergies

NMES = neuro muscular electrical stimulation

NOE = notice of election

NPO = nothing by mouth (*latin: nil per os*)

NP = Nurse Practitioner

NS = normal saline

N&V, NV, or N/V = nausea and vomiting

NWB = non-weight bearing

O

O₂ or O2 = oxygen

O2 Sat = oxygen saturation

OBT = over bed table

OG = oral glucose or orogastric

Oint. = ointment

OJ = orojejenum

OOB = out of bed

Opth = ophthalmology

OSA = obstructive sleep apnea

Ost. = ostomy

OT = Occupational Therapist/Therapy

OTA = Occupational Therapy Assistant,
open to air

OTC = over the counter

oz = ounce

P

p = post, after

PALP = palpate, palpated, palpation

pc = after meals (*latin: post cibum*)

PC = pressure control

PCG = parent caregiver

PCO₂ = partial pressure of carbon dioxide

PCP = primary care physician

PDHC = Pediatric Day Health Center

PDN = Private Duty Nursing

PDS = Private Duty Services

PEEP = positive end expiratory pressure

PEG = percutaneous endoscopic gastrostomy

PERRL/PERRLA = pupils equal round and
reactive to light (accommodate)

Pharm = pharmacy

PICC = peripheral inserted central catheter

PICU = Pediatric Intensive Care Unit

PIP = proximal interphalangeal

PIV = peripheral inserted venous

PLOF = prior level of function

pm = afternoon/night (*latin: post meridiem*)

PMH = past medical history

PN = progress note

PNA = pneumonia

po = by mouth (*latin: per os*)

POA = power of attorney

POC = plan of care

POD = post operative day

POE = prone on elbows

POX = pulse oximetry

PPOT = physician plan of treatment

POT = plan of treatment

PRN = as often as necessary (*latin: pro re nata*)

PROM = passive range of motion

PS = pressure support

PT = Physical Therapy/Therapist

PTA = Physical Therapy Assistant

pt = patient

PVR = post void residual

PWB = partial weight bearing

PX or prog. = prognosis

Q

q.h. = every hour (*latin: quaque hora*)

q/Q = each; every; line over (*latin: quaque*)

QID or q.i.d. = four times daily (*latin: quater in die*)

QIO = Quality Improvement Organization

QUAD = quadriplegic

R

R = right

RA = room air

RE = re-evaluation, regarding

Rehab. = rehabilitation

Req'd = required

Resp = respiratory

RLE = right lower extremity

RN = registered nurse

R/O or RO = rule out

ROM = range of motion

RR = respiratory rate

RUE = right upper extremity

Rx = prescription, therapy

S

Ŝ = without (*latin: sine*)

s/p = status post

s/s = signs & symptoms

Sat = saturated

SBA = stand by assistance

SBQC = small based quad cane

SGA = small for gestational age

SIL = son in law

SIMV = synchronized intermittent mechanical ventilation

SIDS = sudden infant death syndrome

SL = sublingual

SLP/ST = Speech Language Pathologist/Therapist

SLPA = Speech Language Pathology Assistant

SLS = single limb stance

sm or SM = small

SMAFO = supramalleolar ankle foot orthosis

SMO = supra-malleolar orthosis

SN = skilled nurse

SNF = Skilled Nursing Facility

SNV = skilled nursing visit

SOAP = subjective, objective, assessment, plan

SOB = shortness of breath

SOS = step over step

SP or S/P = status post

SpO₂ or SPO2 = pulse oximetry

SPON or spont. = spontaneously

SQ or subcut. = subcutaneous

STAT = immediately (*latin: statim*)

SX = symptoms

SZ or sz = seizure

sxn = suction

T

T&A = tonsils and adenoids, tonsillectomy and adenoidectomy

Tab. = tablet

TB = tuberculosis

TBI = traumatic brain injury

temp. = temperature

THH = hands held

THR = total hip replacement

TID = three times a day (*latin: ter in die*)

TKR = total knee replacement

TLSO = thoracolumbosacral orthosis

TO = telephone order

TOL = tolerated

TPN = total parenteral nutrition

TPR = temperature pulse respiration

Tr. or TR = trace

Trach or TRACH = tracheostomy

Trach/vent = tracheostomy and ventilator

Tsp = teaspoon

TTS = tight to the shaft

TTWB = toe touch weight bearing

T/V or T&V = tracheostomy and ventilator

TX/Tx/tx = treatment or therapy

U

UA = urinalysis

UE = upper extremity

URI = upper respiratory infection

US or U/S = ultrasound

UTI = urinary tract infection

V

VA = Veterans Administration

VET = veteran

Vent = ventilator

VIA or via = by way of

v.o. or VO = verbal order

VP = ventriculoperitoneal

VS = vital signs

VSS = vital signs stable

Vt = ventilation tube

VT = ventricular tachycardia

W

W/C = wheelchair

WB = weight bearing

WBAT = weight bearing as tolerated

WBOS = wide base of support

WFL = within functional limits

WNL = within normal limits

WOB = work of breathing

Wt. = weight

X

X̄ = except

X = times, e.g., "suction x 4"

Y

Y.O. or yo = years old

Yrs. = years

DO NOT USE List of Abbreviations

Do Not Use	Potential Problem	Use Instead
U, u (unit)	Mistaken for “0” (zero), the number “4” (four) or “cc”	Write “unit”
IU (international Unit)	Mistaken for IV (intravenous) or the number 10 (ten)	Write “international Unit”
Q.D., QD, q.d., qd (daily)	Mistaken for each other	Write “daily”
Q.O.D., QOD, q.o.d, qod (every other day)	Period after Q mistaken for “I” and the “O” mistaken for “I”	Write “every other day”
Trailing zero (X.0 mg)*	Decimal point is missed	Write X mg
Lack of leading zero (.X mg)	Decimal point is missed	Write 0.X mg
MS	Can mean morphine sulfate or magnesium sulfate	Write “morphine sulfate”
M _{SO4} and Mg _{SO4}	Confused for one another	Write “magnesium sulfate”

*Exception: A “trailing zero” may be used only where required to demonstrate the level of precision of the value being reported, such as for laboratory results, imaging studies that report size of lesions, or catheter/tube sizes. It may not be used in medication orders or other medication-related documentation.

HCHB HH Service Code Description

Last Modified on 12/13/2024 1:28 pm EST

Purpose:

To provide an overview of discipline codes, service codes, and buddy codes.

Regulation:

Policy:

Process:

- All Service Codes are pre-fixed with a discipline code. if '11' is for a Routine visit then a PT11 would be a Physical Therapy Routine Visit or a SN11 would be a Skilled Nursing Routine Visit. Below is a list of the Home Health Discipline Codes:

- For reference the [Home Health Service codes 12.13.24.xlsx](#) spreadsheet is available with greater detail for each service code in the HCHB system.

Discipline Codes	
CT = COTA	PA = Physical Therapy Assistant
HH = Home Health Aide	PDR = RN Pediatric
HM = Homemaker	PDS = SN Pediatric
IVN = Infusion No POC	PSY = RN Psychiatric
IVR = RN Infusion	PT = Physical Therapist
IVS = SN Infusion	RD = Registered Dietician
LPN = Licensed Practical Nurse	RN = Registered Nurse
MS = Medical Social Worker	RT = Respiratory Therapy
MSWI = Medical Social Worker (In Person)	SN = Skilled Nurse (RN or LPN)
MSWT = Medical Social Worker (Telephone)	ST = Speech Therapist
OT = Occupational Therapist	

- To make a complete Service Code the Discipline Code needs to be followed by a Numerical or Alphabetical code. The descriptions of these codes are listed below, first in the 'Service Codes Description' table are the 'regular' service codes. The second table below houses the 'Medical Treatment - "BUDDY CODES"' table. A **Buddy Code** indicates that something is due on that associated visit and **MUST** accompany a regular service code.

- NOTE: Some codes "*Appear at the end of a Service Code*" to further identify the code. These codes are noted below. A common example of this is the use of 'N' for non-billable supervisory visits. A RN10N would indicate that a Registered Nurse (RN) is completing a Supervision (10) visit that is Non-Billable (N).

Home Health Service Codes Description	CODE
Billable Admission with OASIS Data Collection	00
Billable Evaluation for "Add-on" Discipline	01
Recert with Skill (OASIS Recert)	02
Recert WITHOUT Skill	03
Transition Recert – Only used for first 60 days on HCHB system	04
ROC/Recert (ROC within the 5 day EOE window)	05
Recert for Add-on Discipline	06
Routine Visit + Supervisory	10
Routine / Subsequent Visit	11
Resumption of Care	15
Oasis Follow UP	17
DC Visit + OASIS Collection (from agency)	18
DC Visit without OASIS collection (from discipline only)	19
Infusion Hi-Tech Visit – Lasting 1.5 HRS	26
Therapy Reassessment Visit	33
Transfer to Inpatient Facility – Data Collection Only (No visit made)	44
Discharge – Data Collection Only (No visit made)	66
Death At Home	88
Transfer to Inpatient Facility	99
Billable in Home (RN10B) - (Appears at the end of a Service Code)	B
DO NOT MOVE (DNM appears at the beginning of the discipline, for example: "DNM-SN") - Used for physician ordered date, INR's that have to be completed on a specific date.	DNM
Lymphedema Visit - (Appears at the end of a Service Code)	LY
OT Admission w/Modified OASIS (OT00(MOD)) - (Appears at the end of a Service Code)	(MOD)
Maintenance Therapy - (Appears at the end of a Service Code)	MT
As part of the Non-Admit process, the Executive Director will change the Service Code to a Non-Admit Service Code. (For example - NADMIT - RN, NADMIT-PT, NADMIT-OT, NADMIT-ST)	NADMIT
N on the end of a code denotes "No Bill" (Appears at end of a Service Code, eg., "OT11N")	N
Phone Visit - (Appears at the end of a Service Code)	P
PRN Routine Visit - (Appears at the end of a Service Code)	PRN
Rapid Subsequent (Appears at end of a Service Code, eg., "SN11RS")	RS
X codes denote No OASIS (Appears at end of a Service Code, eg., (" PDR-05X")	X

Medical Treatment – "Buddy" Codes – Indicate something is due and MUST accompany a regular service code.	CODE
Procedure Due	90
Lab Due	91
Wound Pictures Due	92
Wound Measurements Due	93
Indwelling Catheter Change	94
Injection Due	95
IV CAP / Dressing Change Due	96
INR Due	97
RN, PT, OT, or ST - Transfer to Inpatient Facility - Visit Made	99
Advance Beneficiary Notice	ABN
Notice of Medicare Non-Coverage	NOMNC
Reminder that a Recert Visit is due on this date.	RC DUE

Skills Checklist

Name: _____ Date of Hire: _____

The Nurse is expected to be competent in the areas that are *** (per scope of practice) and evaluated by qualified Observer for competency. Upon hire, the nurse will complete this Self-Evaluation of all listed skills. (The designated preceptor/nursing manager will assist the employees in any area that has a self-rating of B, to ensure competency).

Self-Rating

A = I can perform independently

B = I need Review/Have no experience

Preceptor/Manager Competency assessment method

DOS = Direct Onsite Observation/Skills Lab

O = Oral Questions & Answer

Observer Printed Name/Credentials: _____ Initials: _____

Observer Printed Name/Credentials: _____ Initials: _____

Nursing Process/Practices	Self-Rating	Method	Qualified Observer Evaluation	
			Competency	Observer Initial's/date
1.***Demonstrates ability to perform a complete systems head to toe assessment of a patient	<input type="checkbox"/> A <input type="checkbox"/> B	<input type="checkbox"/> DOS	<input type="checkbox"/> Met <input type="checkbox"/> Not Met	
2.***Demonstrates effective communication skills	<input type="checkbox"/> A <input type="checkbox"/> B	<input type="checkbox"/> DOS	<input type="checkbox"/> Met <input type="checkbox"/> Not Met	
3.***Accurately Documents Physician Verbal Orders and Communicates New Orders to Team Members	<input type="checkbox"/> A <input type="checkbox"/> B	<input type="checkbox"/> DOS	<input type="checkbox"/> Met <input type="checkbox"/> Not Met	
4.***Demonstrates real time documentation to include completing all required documentation in the patient's home i.e., eligibility, skilled need evident in the notes	<input type="checkbox"/> A <input type="checkbox"/> B	<input type="checkbox"/> DOS	<input type="checkbox"/> Met <input type="checkbox"/> Not Met	
5.***Ability to use Critical thinking and decision making to assure patient's needs are met	<input type="checkbox"/> A <input type="checkbox"/> B	<input type="checkbox"/> DOS	<input type="checkbox"/> Met <input type="checkbox"/> Not Met	
6.***Donning/Doffing PPE	<input type="checkbox"/> A <input type="checkbox"/> B	<input type="checkbox"/> DOS	<input type="checkbox"/> Met <input type="checkbox"/> Not Met	
7.***Bag Technique	<input type="checkbox"/> A <input type="checkbox"/> B	<input type="checkbox"/> DOS	<input type="checkbox"/> Met <input type="checkbox"/> Not Met

I have evaluated my nursing competency to the best of my ability. Those items I have marked A are areas which I have a working knowledge and past experiences and can perform safely.	Self Eval Date		Initials
* I understand I am responsible for seeking proper resources prior to performing skills for which competency has not been demonstrated during orientation. *	Orientation Completion	Eval Date	Initials

Comments

Nurse Signature

Printed Name/Credentials

Date

Upon completion of orientation, supervisor to review with the Nurse and send this updated form with all required signatures to the Clinical Manager/Administrator to be added to my personal file, and plan to review annually and as needed.
