Object Data Elements Logic

Data element labels below in **BOLD** are part of the natural key of this resource and are required data elements for the record to send through Ed-Fi.

- The Mandatory / Conditional / Optional column indicates what the state requires for each data element.

When a student is involved in multiple events of an incident, and those events differ in their calculated criminalGangRelatedEventDescriptor status, report based on the following priority order:

• 2 > 1 > 0
• Example:
   ◦ A student is involved in three events of an incident. Event #1 calculates to Code 0. Event #2 calculates to Code 1. Event #3 calculates to Code 2. Code 2 will report because it takes priority over the other codes. | M | Behavior | BehaviorEvent .gangRelated
