Core Ed-Fi Suite v3.6.1, Data Standard v4.0: Student Discipline Incident Associations

Table of Contents

- [Summary](#)
- [Object Triggering Logic](#)
- [Required Resources \(Upstream\)](#)
- [Dependent Resources \(Downstream\)](#)
- [Error Log](#)
- [Object Data Elements Logic](#)
- [Appendix](#)

Summary

Deprecated: Users of this element are advised to use StudentDisciplineIncidentBehaviorAssociation or StudentDisciplineIncidentNon-Offender association instead. Expect removal of this element in a future release. This association indicates those students who were victims, perpetrators, witnesses, and reporters for a discipline incident.

Object Triggering Logic

Action	Business Rule(s)
Post	<p>Report a record when a Behavior Incident is marked as Complete AND there is at least one Event with an Event Type mapped to an Ed-Fi Code AND the student is associated to that event with a Role that is mapped to an Ed-Fi Code.</p> <ul style="list-style-type: none"> • The mapping for Event Types can be found in the Resource Preferences of the Ed-Fi Connection under the Discipline Incidents resource. • The mapping for Role can be found in the Resource Preferences of the Ed-Fi Connection under the Student Discipline Incident Associations resource. • Do not report a record if the any of the following exclusions are present: <ul style="list-style-type: none"> ◦ Enrollment No Show ◦ Calendar Exclude ◦ School Exclude

<p>Delete /Post</p> <p>Put</p>	<p>A DELETE / POST will be performed if the data element being altered is part of the resource's natural key. A PUT will be performed otherwise.</p> <ul style="list-style-type: none"> • When any of the following information is changed on Enrollments: <ul style="list-style-type: none"> ◦ Enrollment ID (New Enrollment) ◦ Start Date ◦ End Date ◦ No Show • When any of the following information is changed on Behavior Events: <ul style="list-style-type: none"> ◦ Event ID (New Event) ◦ Event Type ◦ Role • When any of the following information is changed on Behavior Incidents: <ul style="list-style-type: none"> ◦ Status • Changes to Resource Preferences mappings do NOT trigger. A manual resync must be performed on the resource if mappings are changed.
<p>Delete</p>	<ul style="list-style-type: none"> • When a Behavior Event is deleted. • When a Behavior Incident is changed to a Status other than Complete. • When the Enrollment is deleted or changed to no longer overlap the configured year. • When the Incident is deleted or changed to no longer overlap the configured year. • When the student is now excluded in some way. • When a record is in the Ed-Fi Identity Mapping Report but cannot be found on the Campus site.

Required Resources (Upstream)

The following resources must be sent prior to this resource:

- Discipline Incidents
- Students

Dependent Resources (Downstream)

The following resources are dependent on this resource (must be sent after this resource):

- Discipline Actions

Error Log

The following are potential Tier 1 (Ed-Fi API generated) or custom (Campus generated) errors you may receive when posting, updating, or deleting this resource. Please keep in mind that the "Error Message" below may not match your exact error message.

Error Message	Possible Causes / How to Fix
400: Validation of ' RESOURCE ' failed. FIELD is required.	<p>An element of the JSON that is required is missing and needs to be added.</p> <ul style="list-style-type: none"> • Double check that all bolded data elements below are reporting a valid value and no data elements below are reporting an invalid value.
400: ' RESOURCE ' failed. RESOURCE reference could not be resolved.	<p>A resource that was referenced from a difference resource does not yet exist.</p> <ul style="list-style-type: none"> • Resync the resource being mentioned in the error, then resync the errored resource. Alternatively, the resource being referenced may be incorrect. This can happen with Schools and the Ed-Fi School ID being used as an example. Double check the referenced values being sent are valid.

<p>403: Authorization denied. The claim does not have any established relationships with the requested resource.</p>	<p>The key/secret being used does not have permission to send a record for the resource / referenced resource.</p> <ul style="list-style-type: none"> • Double check your API credentials (key/secret). Sometimes specific keys/secrets cannot report specific resources. • The referenced person (student, staff, parent, contact, etc.) has not yet been associated to the key /secret. Resync their "linking" resource (Students Student School Associations, Staffs Staff Education Organization Assignment Associations, etc.) then resync the errored resource. • The referenced person (student, staff, parent, contact, etc.) may not exist in the ODS yet. Resync the "person" resource and the "linking" resource (Students Student School Associations, Staffs Staff Education Organization Assignment Associations, etc.) then resync the errored resource.
<p>404: Failed to delete 'RESOURCE'. Record does not exist.</p>	<p>The attempt to delete a specific Ed-Fi record ID in the ODS failed because it did not exist.</p> <ul style="list-style-type: none"> • This error can be ignored. The ID was cleared from the Ed-Fi Identity Mapping Report and will not attempt to delete again.
<p>409: A natural key conflict occurred when attempting to create a new resource 'RESOURCE' with a duplicate key.</p>	<p>The Ed-Fi API has a natural key system alongside a standard REST ID system. This error is often protecting against the erroneous creation of a duplicate record in the API. However, it may also indicate that the natural key requirements of the Ed-Fi API have not been satisfied, and the key needs to be modified.</p> <ul style="list-style-type: none"> • Check for duplicate data in your Campus site. If no duplicate data can be found, report the issue to Campus Support. <ul style="list-style-type: none"> ◦ This can be caused by numerous issues. Our code may be attempting to send duplicate records when it should not. The natural key (bolded fields below) may not be unique enough to satisfy Ed-Fi requirements in all cases. Most times this error will require a code change to fix.
<p>409: The resource (or a subordinate entity of the resource) cannot be deleted because it is a dependency of the 'RESOURCE' entity.</p>	<p>The resource that the application is attempting to delete is referenced from another entity.</p> <ul style="list-style-type: none"> • Use the Delete Tool to delete the referenced resource in the error message. Then retry the delete on the original resource that errored.

500: Internal Server Error.

Something unexpected happened and no specific error message could be returned.

- This issue usually occurs when the ODS is having issues. Confirm that there are no issues with the ODS the data is being sent to and then attempt to retry the errored record.
- Contact Campus Support if 500 errors continue to occur, can be replicated consistently, and the ODS the data is being sent to has no ongoing issues.
 - There is a chance that Campus Ed-Fi code is sending an invalid JSON request resulting in the 500 error.
 - There is a chance that an Ed-Fi Data Standard / API bug is causing the issue.
 - Investigation is needed in these cases as there are many different potential causes.

Object Data Elements Logic

Data element labels below in **BOLD** are part of the natural key of this resource and are required data elements for the record to send through Ed-Fi.

- The Mandatory / Conditional / Optional column indicates what the state requires for each data element. For Core Ed-Fi connections, it indicates what the data standard requires for each data element.

	Data Element Label	Business Rule(s)	Mandatory (M) Conditional (C) Optional (O)	Data Source GUI Path	Database Field	Uses Template Logic (✓ / ✗ / EXT)
1	disciplineIncidentReference (reference)	<p><i>A reference to the Discipline Incidents resource associated with the Student Discipline Incident Association being reported.</i></p> <hr/> <p>Reports the fields that are part of the Natural Key for the Discipline Incidents resource.</p>	M	N/A	N/A	✓
2	studentReference (reference)	<p><i>A reference to the Students resource associated with the Student Discipline Incident Association being reported.</i></p> <hr/> <p>Reports the fields that are part of the Natural Key for the Students resource.</p>	M	N/A	N/A	✓

3	behaviors (<i>array</i>)	<p>An unordered collection of studentDiscipline IncidentAssociation Behaviors. Describes behavior by category and provides a detailed description.</p> <hr/> <p>Reports the following data elements in an array:</p> <ul style="list-style-type: none"> • behaviorDescriptor <ul style="list-style-type: none"> ○ Reports the Ed-Fi Code mapped to the value selected for Event Type. <ul style="list-style-type: none"> ▪ This mapping can be found in the Resource Preferences of the Ed-Fi Connection under the Discipline Incidents resource. ○ Reports all unique Ed-Fi Codes from Event Types the student is associated to on the specific Incident reporting. • The following data elements do not report: <ul style="list-style-type: none"> ○ behaviorDetailedDescription 	O	Behavior Management	BehaviorEvent .code	✔
4	studentParticipation CodeDescriptor (<i>string</i>)	<p><i>The role or type of participation of a student in a discipline incident.</i></p> <hr/> <p>Reports the Ed-Fi Code mapped to the value selected for Role.</p> <ul style="list-style-type: none"> • If the student has more than one Role, the last one to sync with the ODS "wins" and is posted on the record. • This mapping can be found in the Resource Preferences of the Ed-Fi Connection under the Student Discipline Incident Associations resource. • Does not report if Role is NULL or not mapped to an Ed-Fi Code. 	M	Behavior Management	BehaviorRole .role	✔
