

# AlarmBiller Release Notes

April 2025

Version 4.52.1

## **Application Corrections**

### **AlarmBiller**

#### **REVERSED: User can't adjust parts in warehouses - custom grid layout [55789]**

We reversed the fix made for adjusting and transferring parts on custom grid layouts. We will address this issue again in a future update.

#### **Unable to Open or Edit Work Orders – Spinning Wheel Issue [00134844]**

Users were unable to create or edit work orders. The application displayed a continuous spinning wheel when attempting to access work orders. We corrected this so users can create and edit work orders.
