TX Ed-Fi Suite 3 API v7.1 Data Standard v4.0: Course Transcripts

Summary

This entity is the final record of a student's performance in their courses at the end of a semester or school year.

Object Triggering

Action	Business Rule(s)
Post	When transcript records are posted for a student and they have a valid Student School Association for the configured year When a resync is completed for the school the student is enrolled, all eligible transcript records for all years will send for the Student - Do not send a record if the course is marked as inactive - The course must exist in the ODS for the Course Reference to send as part of this resource. Use the following logic to determine which Course Reference to send: - If the School Number and Course Number on the transcript record are in the configured year ODS, report the Course reference with those numbers - If School Number and Course Number on the transcript record are in the ODS for the configured year but not the school where the student is enrolled, report the course reference with the School and Course Number that matches the School & Course in the ODS - If School Number on the transcript record is in the ODS for the configured year but not the school where the student is enrolled but the Course number matches the school they are enrolled, the course reference will report with the School Number where the student is enrolled - If the School Number on the transcript record is not in the ODS and the course number matches the school where the student is enrolled, the course reference will report where the student is enrolled - If the School Number on the transcript is not in the ODS but the Course Number matches a school where the student is not enrolled, the course reference will report with the school where the course match is found. If there is more than 1 school with that course number, pick the school with the highest schoolID. - If the School Number on the transcript is not in the ODS and the course number does not match any course in the district, a record will not send and will not trigger an error - Do not send a record if the transcript's score is null - Do not send record if the School Exclude check box is checked - Do not send record if the Calendar Exclude check box is checked
Put	When any field not part of the Natural Key is changed

Delete /Post	When any part of the Natural Key is changed
Delete	When a transcript record is deleted for a student All Transcript records will only delete when a student has only 1 Student School Association record for a specific Year and that record is deleted
