Managely Release Notes

May 2025

Version 5.3.48.13

MANAGELY®

Application Corrections

E-Form Issues [00137577]

Extra elements were being pulled while working on an eForm.

We fixed these issues with eForms:

- eForm Document Migration (Version 6 to 7): Fixed a root issue encountered during the migration of eForm documents from version 6 to version 7.
- PDF file eForm Footer Section: Prevented the footer section from being added to PDF file eForm that only contains a detail section.
- GUID Generation Fix: Resolved the issue with invalid GUIDs by generating unique and valid GUIDs.
- Frontend Rendering Fix: Fixed the issue where the footer section was being displayed in the PDF file eForm when it was not needed.
